

Test for medical interpreters

Steps in Taking the Oral Test - Sight translation test

Silently go over the entire passage before translating; Silently read each complete sentence before translating, one sentence at a time.

Avoid word for word translation. Instead, organize best possible target language sentence that conveys the complete meaning of the original sentence; Mind your enunciation; Budget your time for each sentence, but be relaxed.

Consecutive interpretation

Listen carefully to the whole sentence/segment;

Pay special attention to key words and details (names, numbers, dates, etc.); Memorize key words and details (or take notes if it works better for you); Interpret into best possible target language sentences;

Mind your enunciation; Save your repeats (two allowed) for long sentences/segments.

Simultaneous interpretation

Look out for the points the speaker is trying to get across;

Pay attention to important details such as date, time, and numbers;

Keep a steady flow of words, and don't waste time fumbling for the exact target language equivalents; Try to establish a delay between the speaker and you that is comfortable for you; Keep pace with the speaker at the delay you established; Don't panic over or think about what you miss; Just remain calm and catch up with the speaker as quickly as you can.

test taking tips - Before the test

Be rested and comfortable;

Know what to expect in the test (content, format, timing, etc.);

Be concerned (helps you do your best);

Avoid test anxiety;

Arrive early on test day.

During the test
