Obenauf, 2018-01-25 This laboratory manual for allied health or general microbiology has been written with the student in mind. The authors have used their years of teaching microbiology and microbiology laboratory at all levels to identify and relate the fundamental concepts that are important to the understanding of the science and students' success in their future field. They have included case studies to exemplify the relevance of the science and extensive visual imagery to help students understand and learn the content. Most importantly, the authors hope this manual will help students experience the thrill of bench science and share some of the enthusiasm they have for microbiology, a field of science that is dynamic, exciting, and touches every aspect of your life. The third edition lab manual complements content covered in Cowan's Microbiology Fundamentals: A Clinical Approach 3e. **Microbiology** James G. Cappuccino, Natalie Sherman, 1999 Microbiology A Laboratory Manual Fifth Edition is a comprehensive text for undergraduate microbiology students. With seventy-seven experiments, it provides a wide variety of materials for instructors to choose from when planning their classes. These inexpensive, customizable labs are a perfect complement to any Microbiology text. The Manual presents labs from simple to complex, allowing for a customized instructional approach. To facilitate instruction and learning, each experiment is presented in a consistent format: purpose, principles, materials, procedure, observations, and results, and review questions. A smear preparation laboratory experiment has been added to help students with this technique and to prepare them for other lab work during the semester. Sixteen lab experiments have been updated to improve clarity and student comprehension. An updated full-color insert contains new, clearer photographs that are tied to the experiments for easy reference. The Instructors Guide has been revised to reflect all of the changes in the lab manual. Instructors can create a manual tailored to course needs through a custom publishing option. **National Library of Medicine Audiovisuals Catalog** National Library of
