**Family Medicine** J. L. Buckingham, E. P. Donatelle, W. E. Jacott, M. G. Rosen, Robert B. Taylor, 2013-06-29 JOHN S MILLIS In 1966 the Citizens Commission on Graduate Medical Education observed that the explosive growth in biomedical science and the consequent increase in medical skill and technology of the twentieth century had made it possible for physicians to respond to the episodes of illness of patients with an ever increasing effectiveness but that the increase in knowledge and technology had forced most physicians to concentrate upon a disease entity an organ or organ system or a particular mode of diagnosis or therapy As a result there had been a growing lack of continuing and comprehensive patient care The Commission expressed the opinion that Now in order to bring medicine s enhanced diagnostic and therapeutic powers fully to the benefit of society it is necessary to have many physicians who can put medicine together again The Commission proceeded to recommend the education and training of substantial numbers of Primary Physicians who would by assuming primary responsibility for the patient s welfare in sickness and in health provide continuing and comprehensive health care to the citizens of the United States In 1978 it is clear that the recommendation has been accepted by the public the medical profession and medical education There has been a vigorous response in the development of family medicine and in the fields of internal medicine pediatrics and obstetrics One is particularly impressed by the wide acceptance on the part of medical students of the concept of the primary physician Dr John S The Innovator's Prescription: A Disruptive Solution for Health Care Clayton M. Christensen, Jerome H. Grossman, Jason Hwang, 2008-10-31 A groundbreaking prescription for health care reform from a legendary leader in innovation Our health care system is in critical condition Each year fewer Americans can afford it fewer businesses can provide it and fewer government programs can promise it for future generations We need a cure and we need it now Harvard Business School s Clayton M Christensen whose bestselling The Innovator s Dilemma revolutionized the business world presents The Innovator s Prescription a comprehensive analysis of the strategies that will improve health care and make it affordable Christensen applies the principles of disruptive innovation to the broken health care system with two pioneers in the field Dr Jerome Grossman and Dr Jason Hwang Together they examine a range of symptoms and offer proven solutions YOU LL DISCOVER HOW Precision medicine reduces costs and makes good on the promise of personalized care Disruptive business models improve quality accessibility and affordability by changing the way hospitals and doctors work Patient networks enable better treatment of chronic diseases Employers can change the roles they play in health care to compete effectively in the era of globalization

Hoover's Handbook of Emerging Companies 2004 Hoover's, Incorporated,2004-04      The Doctor Who Wasn't There Jeremy A. Greene,2022-10-26 This gripping history shows how the electronic devices we use to access care influence the kind of care we receive The Doctor Who Wasn't There traces the long arc of enthusiasm for and skepticism of electronic media in health and medicine Over the past century a series of new technologies promised to democratize access to healthcare From the humble telephone to the connected smartphone from FM radio to wireless wearables from cable television to the electronic brains of networked mainframe computers each new platform has promised a radical reformation of the healthcare landscape With equal attention to the history of technology the history of medicine and the politics and economics of American healthcare physician and historian Jeremy A Greene explores the role that electronic media play for better and for worse in the past present and future of our health Today's telehealth devices are far more sophisticated than the hook and ringer telephones of the 1920s the radios that broadcasted health data in the 1940s the closed circuit televisions that enabled telemedicine in the 1950s or the online systems that created electronic medical records in the 1960s But the ethical economic and logistical concerns they raise are prefigured in the past as are the gaps between what was promised and what was delivered Each of these platforms also produced subtle transformations in health and healthcare that we have learned to forget displaced by promises of ever newer forms of communication that took their place Illuminating the social and technical contexts in which electronic medicine has been conceived and put into practice Greene's history shows the urgent stakes then and now for those who would seek in new media the means to build a more equitable future for American healthcare
