

Introduction

Megafunctions are vendor-specific intellectual property (IP) blocks that are parameterizable and optimized for Altera® device architectures. Altera provides a library of megafunctions, including the Library of Parameterized Modules (LPM) functions and other parameterized functions, which offer more efficient logic synthesis and device implementation.

- For more information about a particular megafunction, refer to the user guide of the specific megafunction in the [Literature User Guides](#) section of the Altera website.
- For the latest list of available megafunctions and LPMs, refer to the Megafunctions or the LPM section in the [Quartus II Help](#).

Overview

The MegaWizard® Plug-In Manager allows you to create and modify design files that contain custom megafunction variations, which you can then instantiate in a design file. These custom megafunction variations are based on Altera-provided megafunctions. You can use the MegaWizard Plug-In Manager to create Altera megafunctions, LPM functions, and IP functions for use in designs in the Quartus II software, the EDA design entry, and synthesis tools.

You can start the MegaWizard Plug-In Manager from the Quartus II software through one of the following ways:

- On the Tools menu, click **MegaWizard Plug-In Manager**.
- When working in the Block Editor, from the Edit menu, click **Insert Symbol Block**, or right-click in the Block Editor; point to **Insert**, and click **Symbol as Block**. In the Symbol window, click **MegaWizard Plug-In Manager**.
- Start the stand-alone version of the MegaWizard Plug-In Manager by typing the following command at the command prompt:

```
megawizard
```
- In Windows, go to **All Programs** in the Start menu, select **Quartus II** in the Altera folder, and click **Quartus II MegaWizard Plug-In Manager**.
