**Perspectives on Information** Magnus Ramage, David Chapman, 2011-05-09 Information is everywhere and defines everything in today's society. Moreover, information is a key concept in a wide range of academic disciplines from quantum physics to public policy. However, these disciplines all interpret the concept in quite different ways. This book looks at information in several different academic disciplines: cybernetics, ICT, communications theory, semiotics, information systems, library science, linguistics, quantum physics, and public policy. *Perspectives on Information* brings clarity and coherence to different perspectives through promoting information as a unifying concept across the disciplinary spectrum. Though conceived as a contribution to the ongoing conversation between academic disciplines into the nature of information, the deliberately accessible style of this text, reflecting the authors' backgrounds at The Open University, will make it valuable for anyone who needs to know something more about information. Given the ubiquity of information in the 21st century that means everyone.

**The House Magazine**, 2009 **Technology, Culture and Communication** Jonathan Savage, Clive McGoun, 2012 Providing clear guidance on the underpinning theory and policy and drawing upon current initiatives in schools, this book is essential reading for trainee and practising teachers wanting to know how the technology and media dimension can be delivered in practice. *Teaching Contemporary Themes in Secondary Education: Technology, Culture and Communication* Jonathan Savage, Clive McGoun, 2012-04-12 The media has a huge impact on how we view society and the world, and new technologies continue to transform the way in which we work and learn. It is therefore essential that young people can engage critically in their consumption of media and the internet and are able to make informed decisions about the technologies they use. This book explores Parliamentary Debates (Hansard). Great Britain. Parliament. House of Commons, 2008 Access to Public Sector Information Brian F. Fitzgerald, 2010 On the back of the growing capacity of networked digital information technologies to process and visualise large amounts of information in a timely, efficient and user-driven manner, we have seen an increasing demand for better access to and re-use of public sector information. The story is not a new one. Share knowledge and together we can do great things. Limit access and we reduce the potential for opportunity. The two volumes of this book seek to explain and analyse the global shift in the way we manage public sector information. In doing so, they collect and present papers, reports and submissions on the topic by the leading authors and institutions from across the world. These provide people tasked with mapping out and implementing information policy with reference material and practical guidance. Volume 2 presents a selection of the key reports and submissions that have been published over the last few years. The volumes are sold separately and as a set. **Reinventing Public Service**
