Handbook of Research on Interdisciplinary Approaches to Decision Making for Sustainable Supply Chains

Awasthi, Anjali, Grzybowska, Katarzyna, 2019-09-27 Businesses must create initiatives and adopt eco friendly practices in order to adhere to the sustainability goals of a globalized world Recycling product service systems and green manufacturing are just a few methods businesses use within a sustainable supply chain However these tools and techniques must also ensure business growth in order to remain relevant in an environmentally conscious world The Handbook of Research on Interdisciplinary Approaches to Decision Making for Sustainable Supply Chains provides interdisciplinary approaches to sustainable supply chain management through the optimization of system performance and development of new policies design networks and effective reverse logistics practices Featuring research on topics such as industrial symbiosis green collaboration and clean transportation this book is ideally designed for policymakers business executives warehouse managers operations managers suppliers industry professionals sustainability developers decision makers students academicians practitioners and researchers seeking current research on reducing the environmental impacts of businesses via sustainable supply chain planning *Handbook of Research on Emerging Trends and Applications of Machine Learning* Solanki, Arun, Kumar, Sandeep, Nayyar, Anand, 2019-12-13 As today's world continues to advance Artificial Intelligence AI is a field that has become a staple of technological development and led to the advancement of numerous professional industries An application within AI that has gained attention is machine learning Machine learning uses statistical techniques and algorithms to give computer systems the ability to understand and its popularity has circulated through many trades Understanding this technology and its countless implementations is pivotal for scientists and researchers across the world The Handbook of Research on Emerging Trends and Applications of Machine Learning provides a high level understanding of various machine learning algorithms along with modern tools and techniques using Artificial Intelligence In addition this book explores the critical role that machine learning plays in a variety of professional fields including healthcare business and computer science While highlighting topics including image processing predictive analytics and smart grid management this book is ideally designed for developers data scientists business analysts information architects finance agents healthcare professionals researchers retail traders professors and graduate students seeking current research on the benefits implementations and trends of machine learning Advanced Neuroimaging Methods for Studying Autism Disorder Alessandro Grecucci, Roma Siugzdaite, Remo Job, 2017-11-16 In the last twenty years many attempts have been made to provide neurobiological models of autism Functional structural and connectivity analyses have highlighted reduced responses in key social areas such as amygdala medial prefrontal cortex cingulate cortex and superior temporal sulcus However these studies present discrepant results and some of them have been questioned for methodological limitations The aim of this research topic is to present advanced neuroimaging methods able to capture the complexity of the neural deficits displayed

in autism This special issue presents new studies using structural and functional MRI as well as magnetoencephalography and novel protocols to analyze data Analysis of Cluster Variability Noise Reduction Strategies Source based Morphometry Functional Connectivity Density Restriction Spectrum Imaging and the others We believe it is time to integrate data provided by different techniques and methodologies in order to have a better understanding of autism

Human and Animal Models for Translational Research on Neurodegeneration: Challenges and Opportunities From South America

Agustín Ibáñez, Lucas Sedeño, Adolfo M. García, Robert M.J. Deacon, Patricia Cogram, 2018-06-21 Neurodegenerative diseases are the most frequent cause of dementia representing a burden for public health systems especially in middle and middle high income countries Although most research on this issue is concentrated in first world centers growing efforts in South America are affording important breakthroughs This emerging agenda poses new challenges for the region but also new opportunities for the field This book aims to integrate the community of experts across the globe and the region and to establish new challenges and developments for future investigation We present research focused on neurodegenerative research in South America We introduce studies assessing the interplay among genetic neural and behavioral dimensions of these diseases as well as articles on vulnerability factors comparisons of findings from various countries and works promoting multicenter and collaborative networking More generally our book covers a broad scope of human research approaches behavioral assessment neuroimaging electromagnetic techniques brain connectivity peripheral measures animal methodologies genetics epigenetics proteomics metabolomics other molecular biology tools species all human and non human animals sporadic and genetic versions and article types original research review and opinion papers Through this wide ranging proposal we hope to introduce a fresh approach to the challenges and opportunities of research on neurodegeneration in South America

Digital Endocasts Emiliano Bruner, Naomichi Ogihara, Hiroki C. Tanabe, 2017-12-28 This book is dedicated to a specific component of paleoneurology probably the most essential one endocasts A series of original papers collected here focuses on describing methods and techniques that are dedicated to reconstruct and study fossil endocasts through computed tools The book is particularly oriented toward hominid paleoneurology although it also includes chapters on different taxa to provide a more general view of current perspectives and problems in evolutionary neuroanatomy The first part of the book concerns techniques and tools to cast endocranial anatomy The second part deals with computed morphometrics and the third part is devoted to comparative neurobiology Those who want to approach the field in general terms will find this book especially helpful as will those researchers working with endocranial anatomy and brain evolution The book will also be useful for researchers and graduate students in anthropology bioarchaeology medicine and related fields

DHM and Posturography Sofia Scataglini, Gunther Paul, 2019-08-22 DHM and Posturography explores the body of knowledge and state of the art in digital human modeling along with its application in ergonomics and posturography The book provides an industry first introductory and practitioner

focused overview of human simulation tools with detailed chapters describing elements of posture postural interactions and fields of application Thus DHM tools and a specific scientific practical problem the study of posture are linked in a coherent framework In addition sections show how DHM interfaces with the most common physical devices for posture analysis Case studies provide the applied knowledge necessary for practitioners to make informed decisions Digital Human Modelling is the science of representing humans with their physical properties characteristics and behaviors in computerized virtual models These models can be used standalone or integrated with other computerized object design systems to design or study designs workplaces or products in their relationship with humans Presents an introductory up to date overview and introduction to all industrially relevant DHM systems that will enable users on trialing procurement decisions and initial applications Includes user level examples and case studies of DHM application in various industrial fields Provides a structured and posturography focused compendium that is easy to access read and understand **16th Nordic-Baltic**

This Handbook The MATLAB Handbook is a complete reference tool for the MATLAB computation language and is written for all MATLAB users regardless of their discipline or field s of interest All the built in mathematical graphic and system based commands avail able in MATLAB 51 are detailed herein Overall Organization One of the main premises of The MATLAB Handbook is that most MATLAB users ap proach the system to solve a particular problem or set of problems in a specific subject area Therefore all commands are organized in logical subsets that reflect these different categories e g linear equations ordinary differential equations sur face and volume graphics etc and the commands within a subset are explained in a similar language creating a tool that allows you quick and confident access to the information necessary to complete the problem you have brought to the system In addition because there is much information about MATLAB that is very difficult to express on a purely command by command basis each subject is prefaced with an introductory section Here detailed examples are given profiling some of the most common applications of the commands in that particular section There is also an introductory session titled MATLAB Quick Start which is intended to get those readers not already familiar with MATLAB off to a flying start
