Chapter 1

An Introduction to LuaTeX

1.1 What is it—and what makes it so different?

LuaTeX is a *toolkit*—it contains sophisticated software tools and components with which you can construct (typeset) a wide range of documents. The title of this article also poses two questions about LuaTeX: “What is it—and what makes it so different?” The answer to “What is it?” may seem obvious: “It’s a TeX typesetting engine!” Indeed it is, but a broader view, and one to which this author subscribes, is that LuaTeX is an extremely versatile TeX-based document construction and engineering system.

1.1.1 Explaining LuaTeX: Where to start?

The goal of this first article on LuaTeX is to offer a context for understanding what this TeX engine provides and why/how its design enables users to build/design/revise a wide range of solutions to complex typesetting and design problems—perhaps also offering some degree of “future proofing.”

Chapter 2

LuaTeX: Background and history

2.1 Introduction

LuaTeX is, in TeX terms, “the new kid on the block” despite having been in active development for over 10 years.

2.1.1 LuaTeX: Opening up TeX’s “black box”

Kern’s original TeX program is the common ancestor of all modern TeX engines in use today and LuaTeX is, in effect, the latest evolutionary step distilld from the pdfTeX program but with the addition of some powerful software components which bring a great deal of extra functionality.

Brookes, Fernanda Dorea, 2023-10-23 The current COVID 19 pandemic has expanded lay people's vocabulary PCR testing is no longer mentioned only by virologists nor are the terms basic reproduction ratio and herd immunity limited to epidemiologists This expansion of vocabulary that was previously only used in specialist settings already demonstrates global societal impact We have learnt that it is insufficient simply to act on disease emergence and spread More focus is needed on prevention and surveillance of the precursors of emerging infectious disease as well as early detection To succeed in this it is a necessity to collaborate across sectors academics governments industry and the public in a transdisciplinary way
