Late Blight Of Potato In Africa:

Potato and Sweetpotato in Africa Jan Low, Moses Nyongesa, Sara Quinn, Monica Parker, 2015-10-28 Sweetpotato and potato are expanding faster than any other food crops in sub Saharan Africa There is growing investment in research to address bottlenecks in value chains concerning these two crops and growing interest from the private sector in investing in them This book addresses five major themes on sweetpotato and potato policies for germplasm exchange food security and trade in Africa seed systems breeding and disease management post harvest management processing technologies and marketing systems nutritional value and changing behaviours

Late Blight of Potato Jan W. Henfling, International Potato Center, 1987 **a threat to global food security**, *Potato Production Worldwide* Mehmet Emin Caliskan, Allah Bakhsh, Khawar Jabran, 2022-10-22 Potato is a crop grown on all inhabited continents of the globe It is included in the top five crops of the world used as staple food in several countries and the number of people daily consuming the potato may surpass one billion Despite the high quantities of seed potato produced worldwide there are yield gaps due to challenges such as abiotic stresses pests climate change and poor production practices A region wide critical analysis of yield declining factors can help formulate management strategies that can improve potato yields Bridging yield gaps in potato will ultimately ensure the role of this crop in securing current and future food security Potato Production Worldwide presents information on this global crop from its history morphology and taxonomy to the growth and development of the potato crop including the latest strategies in addressing today s biotic and abiotic challenges This book identifies the reasons for yield gaps in various potato production regions of the world as well as presenting the best production practices pest management strategies and approaches to deal with climate change from the perspective of potato production Chapters provide important insights into potato production cultures and approaches in the major potato production countries Potato Production Worldwide will be a valuable resource for researchers scientists and students seeking a comprehensive view of successful potato production Provides comprehensive information on the origin history taxonomy morphology ecophysiology growth and development of the potato Addresses production practices including irrigation nutrient management harvesting and post harvest techniques Explores the impact of Abiotic stresses drought chilling salinity etc and their management *Can Potatoes Feed the World?* John E. Bradshaw, 2025-07-01 By 2050 the United Nations UN predicts a world population of 9.7 billion compared with 8 billion in 2022 Increases in food and energy production and the supply of fresh water will be needed to sustain this population whilst reducing greenhouse gas emissions to limit global warming The average global temperature is likely to be 2 to 3 degrees Celsius above that in pre industrial times unless there is a greater sense of urgency following the UN Climate Change Conference COP26 in Glasgow in 2021 which still wanted to limit the rise to 1.5 degrees There is also increasing concern about the loss of biodiversity on Earth from human activity including farming as seen in the outcomes of the UN Biodiversity Conference COP15 in Montreal in 2022 More encouragingly on 1 December 2023 134 countries at COP28 in

Dubai endorsed the landmark sustainable agriculture resilient food systems and climate action declaration which put food systems transformation on the global climate agenda While food systems are vital for meeting societal needs and enabling adaptation to climate impacts they are also responsible for as much as a third of global greenhouse gas emissions A warmer climate and loss of biodiversity will make life more difficult for humankind but can potatoes at least help with food security It is a scientific and technological question set in a political economic and societal context It has arisen because potatoes have made the journey from wild species to global food crop The contribution of the potato to the United Nations Millennium Development Goals of providing food security and eradicating poverty was recognized when an International Year of the Potato 2008 IYP 2008 was officially launched at the United Nations UN headquarters in New York on 18 October 2007 by the Director General of FAO Food and Agriculture Organization of the United Nations Today the importance of potatoes can be seen in the context of the United Nations 2030 Agenda for Sustainable Development which was adopted in 2015 and started on 1 January 2016 The agenda has 17 goals the second of which SDG2 is to end hunger achieve food security and improved nutrition and promote sustainable agriculture By 2030 the aim of the agenda is to ensure access by all people in particular the poor and people in vulnerable situations including infants to safe nutritious and sufficient food all year round However the projection in the 2023 Sustainable Development Goals Report was not zero hunger but 600 million people still facing hunger Hence a greater sense of urgency is required and also a need to look beyond 2030 to 2050 This book explores how potatoes can contribute to SDG2 by increasing potato production and improving the nutritional value of potatoes in particular to alleviate micronutrient deficiencies hidden hunger having first explained how potatoes became a major food crop and the lessons to be learnt from a major crop failure and resulting famine
