

AP/MALDI Source for LCQ Classic ion trap

Installation, Operation and Maintenance Manual

February, 2003

⚠ Warning

Optical parts of the AP/MALDI source should be handled with **extreme** care. Touching them with bare fingers, storing them in or exposing them to dirty or dusty environments can result in permanent damage of some optical components. Be aware that the warranty does not extend to the fiber optical cable, which requires special care during storage, installation, and operation of the AP/MALDI source. Any finger tapping, dirt deposition, or exposing to a dirty environment will result in burning the fiber ends. An optical fiber is shipped with special protective caps on its ends. After removing the fiber optic protective caps, please keep them in clean conditions and put the protective caps back on the fiber ends immediately after the cable is detached from a connector or the cable is not used. If cleaning of the fiber end is required please refer to the Maintenance/Troubleshooting section (Section 7) of this manual for a cleaning procedure. It is a good idea to proceed with fiber end cleaning every time an exposure to dirt or a contamination of a fiber end surface is suspected. In normal operation with proper care an optical fiber will have a long lifetime. We've included a spare optical fiber cable in case your first optical fiber cable is accidentally damaged. Additional fiber cables **MUST** be ordered from the AP/MALDI source manufacturer, MassTech, or your sales agent. **ONLY** replace the fiber with an exact replacement from the manufacturer, MassTech (Replacement Part number 6100004).

This product is to be used only in laboratory conditions by trained and skilled technicians and in accordance with these operating and maintenance instructions. Primary safety is ensured by correct assembly of the instrument and by following the instructions and warnings in this manual. To ensure continued safety, please ensure that any voltage source connected to this product has a suitable safety ground and complies with local and national electrical regulations.

Attention: Users of the 8x12 target plate AP/MALDI Source Option:

1. You can start running the Target program only with the Source *closed*. Otherwise you will get a warning message prompting you to close the source.
2. After you start running the Target software, the XY stages are being initialized. Do not try to open the source before this process is finished and you have a "Ready" message in the Status window! ***Forceful Opening of the 8x12 Source during a stage initialization may result in the Source mechanism having mechanical damage!***

For maintenance or repair please contact your sales agent or the manufacturer directly:
