**Multi-Storey Precast Concrete Framed Structures** Kim S. Elliott, Colin Jolly, 2013-10-07 Precast reinforced and prestressed concrete frames provide a high strength stable durable and robust solution for any multi storey structure and are widely regarded as a high quality economic and architecturally versatile technology for the construction of multi storey buildings The resulting buildings satisfy a wide range of commercial and industrial needs Precast concrete buildings behave in a different way to those where the concrete is cast in situ with the components subject to different forces and movements These factors are explored in detail in the second edition of Multi Storey Precast Concrete Framed Structures providing a detailed understanding of the procedures involved in precast structural design This new edition has been fully updated to reflect recent developments and includes many structural calculations based on EUROCODE standards These are shown in parallel with similar calculations based on British Standards to ensure the designer is fully aware of the differences required in designing to EUROCODE standards Civil and structural engineers as well as final year undergraduate and postgraduate students of civil and structural engineering will all find this book to be thorough overview of this important construction technology Frames for Multi-storey Buildings, 1985 **Precast Concrete Structures** Kim S. Elliott, 2019-08-08 This second edition of Precast Concrete Structures introduces the conceptual design ideas for the prefabrication of concrete structures and presents a number of worked examples that translate designs from BS 8110 to Eurocode EC2 before going into the detail of the design manufacture and construction of precast concrete multi storey buildings Detailed structural analysis of precast concrete and its use is provided and some details are presented of recent precast skeletal frames of up to forty storeys The theory is supported by numerous worked examples to Eurocodes and European Product Standards for precast reinforced and prestressed concrete elements composite construction joints and connections and frame stability together with extensive specifications for precast concrete structures The book is extensively illustrated with over 500 photographs and line drawings Design of multi-storey precast concrete structures FIB - International Federation for Structural Concrete, 1986-01-01 **Modernisation, Mechanisation and Industrialisation of Concrete Structures** Kim S. Elliott, Zuhairi Abd. Hamid, 2017-05-01 Modernisation Mechanisation and Industrialisation of Concrete Structures discusses the manufacture of high quality prefabricated concrete construction components and how that can be achieved through the application of developments in concrete technology information modelling and best practice in design and manufacturing techniques Design in Modular Construction Mark Lawson, Ray Ogden, Chris Goodier, 2014-02-24 Modular construction can dramatically improve efficiency in construction through factory production of pre engineered building units and their delivery to the site either as entire buildings or as substantial elements The required technology and application are developing rapidly but design is still in its infancy Good design requires a knowled **Barry's Advanced Construction of Buildings** Stephen Emmitt, 2018-10-05 The updated edition of the authoritative and comprehensive guide to construction

practice The revised fourth edition of Barry s Advanced Construction of Buildings expands on the resource that has become a standard text on the construction of buildings The fourth edition covers the construction of larger scale buildings primarily residential commercial and industrial constructed with load bearing frames in timber concrete and steel supported by chapters on offsite construction piling envelopes to framed buildings fit out and second fix lifts and escalators building pathology upgrading and demolition The author covers the functional and performance requirements of the main building elements as well as building efficiency and information on meeting the challenges of limiting the environmental impact of buildings Each chapter includes new at a glance summaries that introduce the basic material giving a good understanding of the main points quickly and easily The text is fully up to date with the latest building regulations and construction technology This important resource Covers design technology offsite construction site assembly and environmental issues of larger scale buildings including primarily residential commercial and industrial buildings constructed with load bearing frames Highlights the concept of building efficiency with better integration of the topics throughout the text Offers new at a glance summaries at the beginning of each chapter Is a companion to Barry s Introduction to Construction of Buildings fourth edition Written for undergraduate students and those working towards similar NQF level 5 and 6 qualifications in building and construction Barry s Advanced Construction of Buildings is a practical and highly illustrated guide to construction practice It covers the materials and technologies involved in constructing larger scale buildings Cost Studies of Buildings Allan

Ashworth,Srinath Perera,2015-07-16 This practical guide to cost studies of buildings has been updated and revised throughout for the 6th edition New developments in RICS New Rules of Measurement NRM are incorporated throughout the book in addition to new material on e business the internet social media building information modelling sustainability building resilience and carbon estimating This trusted and easy to use guide to the cost management role Focuses on the importance of costs of constructing projects during the different phases of the construction process Features learning outcomes and self assessment questions for each chapter Addresses the requirements of international readers From introductory data on the construction industry and the history of construction economics to recommended methods for cost analysis and post contract cost control Cost Studies of Buildings is an ideal companion for anyone learning about cost management **Static and Dynamic Performance Analysis of Structures and Materials Under Complex Loads and Environmental Excitation** Ping Xiang,Abdelmoumen Anis Bousahla,Huaping Wang,Adesola Ademiloye,2025-05-29

With the development of structural materials more and more new materials and construction methods are applied to infrastructure construction in order to achieve carbon neutrality and emission peak Nowadays people have more and more strict requirements for the comfort safety and resistance to environmental disasters of infrastructure Therefore the static and dynamic performance of new structures and materials under complex environment and load becomes more and more important in construction and design of infrastructure engineering Modern civil engineering has been developing towards

intelligence Both construction technology and material technology are developing towards a more intelligent direction How to take new means to make the structure have good mechanical performance and can sense the external environment and load excitation is a development direction of civil engineering This Research Topic welcomes researches on the macro and micro mechanical performance analysis of materials static and dynamic response analysis of structures in construction engineering bridge engineering railway engineering and geotechnical engineering In addition under the action of wind load and earthquake load the large scale vibration of structures will seriously endanger the safety The safety and stability performances of infrastructures still represent a serious challenge to researchers engineers and constructors This Research Topic is dedicated to the most recent advances in research into the mechanical performances of structures and materials and some related applications We welcome scientists and investigators to contribute Original Research and Review articles addressing the main issues facing the field Potential topics include but are not limited to the following New theoretical numerical and experimental methods for vibration of structures Assessment of dynamic responses of infrastructures under static and dynamic loads Innovative design and mechanical performances of composite structures Intelligent structural health monitoring with optical fiber sensing technology Mechanical performances of structures and materials from micro to macro scales Mechanism of vehicle bridge coupling vibration Structural fatigue performance analysis under earthquakes Infrastructure innovations for durability and resilience with new structure system and materials Dynamic evolution of structural damage under extreme loads such as earthquake typhoon and impact Structural health monitoring of large scale infrastructures Numerical modelling and computational mechanical analysis of structures and infrastructures
