

MANUAL RICE PLANTER

A person wearing blue shorts is using a manual rice planter in a flooded field. The planter is a green metal frame with a yellow tray, used for planting rice seedlings. The person's legs are visible, and they are standing in the water. The background shows a flooded field with some rice plants already growing.

Recent Advances in Operations Management and Optimization Anish Sachdeva, Kapil Kumar Goyal, Rajiv Kumar Garg, J. Paulo Davim, 2024-03-19 The book presents the select proceedings of International Conference on Production and Industrial Engineering CPIE 2023 It covers the current and latest research methods for development and implementation of operation Various topics covered include selection of designing parameters decisions related to conditions of optimum process operation parameters facilities planning and management transportation and supply chain management quality engineering reliability and maintenance product design and development human factors and ergonomics project management service system and service management waste management sustainable manufacturing and operations The book is useful for researchers and professionals working in manufacturing industrial engineering systems engineering and production engineering RMD Sinhgad Technical Institutes Campus International Conference on Innovative Practices in Engineering Technology and Business Management Dr. Sharad Mulik ,2023-01-06 The impact of cutting parameters in the confronting procedure for the most part influences the Tool life and Production time of item The developing rivalry for higher profitability with great surface finish has made the need of utilizing top notch machining instrument The significant cutting parameters in confronting process chiefly cutting speed feed rate depth of cut influence the Tool life and Production time of the completed material This paper reviews the streamlining of cutting parameters in confronting process utilizing Taguchi method An exceptionally structured symmetrical exhibit of Taguchi is utilized to examine the impact of slicing parameters through the modest number of analyses Taguchi technique is an integral asset of improvement ANOVA is utilized to discover which input parameters altogether influence the execution attributes Sign to Noise S N proportion is utilized to gauge the varieties of test information 1 INTRODUCTION Turning is a machining procedure used to get the ideal element of round metal The primary objective in present mechanical period is to create minimal effort quality item with required measurements in an optimum time Therefore the optimum cutting parameters are to be perceived first In turning the metal is in rotational movement and a cutting tool is utilized to shear away the undesired metals This procedure requires lathe machine or turning machine cutting tool work piece and fixture The work piece is fixed in the machine chuck and is pivoted at rapid The cutting tool is taken care of in corresponding to the hub of turn During this machining procedure the cutting parameters profoundly relies on the work piece cutting tool material and so on These are dictated by understanding or machine catalogue Surface roughness Tool life and machining time is a widely used attribute of product quality and in most cases a technical necessity for mechanical products Thus the optimum selection of cutting parameters such as feed rate depth of cut cutting speed etc generates optimum conditions during machining and becomes the main exigency of manufacturing industry Surface roughness Tool life and machining time is an important criterion to find the quality of a surface It is an important response parameter In machining process various parameters are Input Parameters Cutting speed Feed rate Depth of cut Insert radius Cutting fluid

etc Output Parameters surface roughness Tool life and machining time *Rice Science* B. Chandrasekaran,K. Annadurai,R.
