LEFT HAND AT THE BALANCE

In describing the **manual of arms**, the term "balance", refers to a point on the rifle just above the trigger housing.

Whenever a position is described as "diag the body", the rifle barrel is up. The butt is right hip, and the rifle barrel crosses a point the junction of neck and left shoulder. The rifle is grasped at the balance with the left hand, hand toward the body with wrist straight.

The cadence for rifle movement is quick. In early stages of training give full attention to the motions. Cadence is acquired gradually as handling the rifle is mastered. Sometimes may require counting aloud in cadence with

The **manual of arms** is taught at the halt. For the purpose of instruction, it may be taught BY THE NUMBERS. To add interest or to prevent fatigue in long marches, right shoulder to left shoulder (or left shoulder to right shoulder), or port **arms** may be given when marching at attention.

POSITION OF ORDER ARMS

Rest the butt of the rifle on ground with barrel. Hold toe of the butt against right shoe and on toe. Hold rifle between thumb and fingers of right hand, keeping the open part of the hand to the front and forearm behind the weapon. Hold left hand in position of attention.
