Mixed Effects Models and Extensions in Ecology with R Alain Zuur,Elena N. Ieno,Neil Walker,Anatoly A. Saveliev,Graham M. Smith,2009-03-05 Building on the successful Analysing Ecological Data 2007 by Zuur Ieno and Smith the authors now provide an expanded introduction to using regression and its extensions in analysing ecological data As with the earlier book real data sets from postgraduate ecological studies or research projects are used throughout The first part of the book is a largely non mathematical introduction to linear mixed effects modelling GLM and GAM zero inflated models GEE GLMM and GAMM The second part provides ten case studies that range from koalas to deep sea research These chapters provide an invaluable insight into analysing complex ecological datasets including comparisons of different approaches to the same problem By matching ecological questions and data structure to a case study these chapters provide an excellent starting point to analysing your own data Data and R code from all chapters are available from www highstat com **Mixed Effects Models and Extensions in Ecology with R.** Alain F. the basic mathematical skills can be one of the most challenging components of a biologist s training This accessible book provides a contemporary introduction to the classical techniques and modern extensions of linear model analysis one of the most useful approaches in the analysis of scientific data in the life and environmental sciences It emphasizes an estimation based approach that accounts for recent criticisms of the over use of probability values and introduces alternative approaches using information criteria Statistics are introduced through worked analyses performed in R the free open source programming language for statistics and graphics which is rapidly becoming the standard software in many areas of science and technology These analyses use real data sets from ecology evolutionary biology and environmental science and the data sets and R scripts are available as support material The book s structure and user friendly style stem from the author s 20 years of experience teaching statistics to life and environmental scientists at both the undergraduate and graduate levels The New Statistics with R is suitable for senior undergraduate and graduate students professional researchers and practitioners in the fields of ecology evolution environmental studies and computational biology *Canadian Journal of Fisheries and Aquatic Sciences* ,2014-05 **Fire and Climate Change in California** Meg Krawchuk,Max Moritz,2012 *Wildlife Research* ,2015 **Ethology and Behavioral Ecology of Phocids** Daniel P. Costa,Elizabeth A.
