the Paris urchin entered the collective social imaginary as cultural and psychic sites of memory whether in avant garde or more conventional visual culture Visual and literary paradigms of the mythical gamin de Paris were born of recurring political revolutions 1830 1832 1848 1871 and of masculine bourgeois identity constructions that responded to continuing struggles over visions and fantasies of nationhood With the destabilization of traditional patriarchal family models the diminishing of the father's symbolic role and the intensification of the brotherly urchin's psychosexual relationship with the allegorical motherland what had initially been socially marginal eventually became symbolically central in classed and gendered inventions and repeated re-inventions of fraternity people and nation Within a fundamentally split conception of the people the bohemian boy insurrectionary an embodiment of freedom was transformed by ongoing discourses of power and reform of victimization and agency into a capitalist entrepreneur schoolboy colonizer and budding military defender of the fatherland A contested figure of the city became a contradictory emblem of the nation
