La Coscienza Di Zeno Italian Edition:

Literature's Contributions to Scientific Knowledge Dario Maestriperi, 2019-02-08 The most important intellectual development in the academy in the 21st century has been the forging of new relationships between the sciences and the humanities and the realization that interdisciplinary scholarship holds the promise of the unification of all knowledge This groundbreaking book shows how this can be fulfilled Through a wide ranging analysis of arguments concerning the complementarity of arts and sciences advanced by Schelling and Goethe and those about the cognitive value of literature articulated by contemporary philosophers the book shows that literary fiction can contribute to the scientific understanding of human nature With a careful and original examination of autobiographical material and literary texts it demonstrates that European novelists such as Leopold von Sacher Masoch Italo Svevo and Elias Canetti conducted ambitious and innovative literary explorations of the human mind and human behavior using Darwinian theory as their scientific framework and in doing so they anticipated the theoretical developments and empirical findings of cognitive social and evolutionary psychology by almost 100 years The work of these novelists was largely misunderstood by literary scholars but this book's re discovery and illustration of what these writers attempted to accomplish and how they did it show one important path leading to the future unification of all knowledge about the human condition Encyclopedia of Italian Literary Studies: A-J Gaetana
