Sustainable Finance and Banking Marcel Jeucken, 2010-09-23 Banking and finance play a

fundamental role in public policy and economic performance as well as in all forms of commerce and industry They are crucial in determining whether society from governments to individual consumers succeeds in following an environmentally sustainable path However those working in the financial sector are largely unaware of the rationale and pressures for sustainable development and its bearing on their work while those in the relevant research and policy areas commonly overlook how vital the financial sector is for progress Marcel Jeucken sets out to rectify this state of affairs in a style which is accessible to those with no experience of environmental finance issues He provides a comprehensive account of their interdependence why the financial sector is crucial to achieving sustainability and why the triple bottom line of commercial environmental and social success points the way forward for banking From a systematic assessment of major banks around the world he presents a comprehensive account of current best practice an analysis of the differences in approach and performance and recommendations of actions and policies for improved performance that will contribute to sustainable development

Sustainability in Finance Marcel Jeucken,2004 Financial institutions are often the crucial factor in a society's progress toward sustainable development Yet financial workers and public policy researchers are largely unaware of this role Sustainability in Finance seeks to bridge this gap as it posits a theoretical foundation for a finance policy partnership The volume presents an innovative analysis of current practices at both global financial institutions and banks in developing countries and ultimately offers a valuable consideration of the future of sustainable development
