

CONNECTIVITY • LOGICAL MIXING AND CONTROL

A range of optional accessories lets you personalise your expandable system.

Aux 1 • designed for Bike-to-Bike

Both rider and passenger's speech automatically transmits the bike-to-bike radio thanks to the I-VOX, providing easy and safe hands free use. Incoming bike to bike audio on Aux 1 automatically reduces the stereo audio levels on Aux 2 and Aux 4 to 50% to improve speech clarity. (Auto reduction can be switched off). When the phone is in use on Aux 3 it disables the bike to bike VOX transmit function so that your phone conversations are not broadcast out to the other bikes, which allows the other bikes to continue with bike to bike communications while you are on the phone. The system can also bike power some recommended bike-to-bike radios, plus take advantage of the optional handlebar remote control, to disable the VOX transmit mode providing privacy for rider-to-passenger communications, and then transmit bike-to-bike messages at any time by either pressing the press-to-talk (PTT) button, or toggle back to the normal VOX transmit mode. When the phone is in use and disables the VOX transmit function, the remote control PTT button lets you over-ride this so that you can transmit to other bikes even when on the phone.

Aux 2 • designed for Stereo GPS

Incoming audio on Aux 2 automatically reduces the stereo music level on Aux 4 to 50% to improve speech clarity, while automatic gain control compensates for varying noise/speeds and the stereo audio can be faded between the rider and passenger headsets (auto reduction and/or auto gain control can be switched off for improved earplug use). You can use some phones via some GPS units, but in most cases you lose the important GPS audio and safety camera warnings while using the phone through a GPS. This is why we provide separate GPS and phone connectivity to manage this better for you.

Aux 3 • designed for Rider's Stereo Phone

Incoming audio is amplified only to the rider's headset, but can be switched for both rider and passenger use. Incoming audio automatically cuts the stereo music on Aux 4 by 100% and reduces bike-to-bike audio on Aux 1, plus stereo GPS audio on Aux 2 to 50% to improve phone conversation; while at the same time it also disables the bike-to-bike VOX transmit mode to prevent your phone conversation been broadcast to other bikes. *Some phones may require a hands free adaptor.

Aux 4 • designed for Stereo Music

Automatic gain control compensates for varying noise/speed conditions and the stereo audio can be faded between the rider and passenger headsets. Rider and passenger speech plus audio from Aux 1 and 2 automatically reduce the stereo music on Aux 4 to 50%, while audio from Aux 3 fully cuts the music for improved conversations (auto reduction and/or auto gain control can be switched off for improved earplug use).

Aux 5 • designed for Passenger's Stereo/Phone

Incoming audio is amplified only to the passenger's headset, but can be switched to both rider and passenger. Incoming audio has no effect to any other Aux connections so that the passenger can enjoy their own stereo music without disruption to other inputs or outputs. We recommend using the optional remote PTT if using a bike-to-bike radio, so that you can manually disable the VOX transmit mode when the passenger is using their phone.
