 subject of debate however cell and tissue specific transcriptional changes in several immune related genes have been
 identified as potential drivers In addition to genetic changes losses in the bacterial diversity within the microbiome are also
 observed during aging However it is unclear whether this may be a cause or consequence of inflammation Host microbiome
 interactions are highly complex and are known to modulate the immune response in several ways For instance while bacteria
 and some bacterial byproducts such as short chain fatty acids can induce differentiation of regulatory T cells and stimulate
 secretion of anti inflammatory cytokines other byproducts can activate pathogen recognition receptors to induce
 inflammation Bacteria can also regulate the transcription of human genes that regulate immune homeostasis and pathogen
 response In turn microRNAs produced by the gut epithelium can regulate transcription in bacteria Faxon ... Librarians'
