 love music All in one place In non marketing lingo Apple Music is built around two major components iCloud Music Library  
 which combines your purchased music library and ripped tracks in one place and the Apple Music streaming catalog where  
 you can find more than 10 million tracks from artists around the world These two parts live side by side in the Music app You  
 can keep each separate by only streaming the Apple Music catalog or you can add streaming songs to your offline Music  
 library where they can be mixed into playlists offline or publicly shareable or shuffled amongst the rest of your music Apple  
 Music also offers a massive recommendation and browsing area for its streaming catalog As you listen to songs in the Music  
 app Apple collects data about your tastes and drops daily custom curated playlists in the app for you to listen to along with a  
 weekly algorithmic New Music mix that suggests songs and artists you might like You can also poke around the entire
