

▲ WARNING

- Do not use any fluid other than MARUTI GENUINE brake fluid. Do not use reclaimed fluid or fluid that has been stored in old or open containers. It is essential that foreign particles and other liquids are kept out of the brake fluid reservoir.

CAUTION

The brake fluid should be replaced every two years or 20,000 km.

NOTE:

With disc brakes, the fluid level can be expected to gradually fall as the brake pads wear.

74A-09-026

Brake Pedal

Check if the brake pedal stops at the regular height without "spongy" feeling when you depress it. If not, have the brake system inspected by your MARUTI SUZUKI dealer. If you doubt the brake pedal for the regular height, check it as follows:

With the engine running, measure the distance between the brake pedal and floor wall when the pedal is depressed with approximately 30 kg (66 lbs) of force. The minimum distance required is 75 mm (3.0 in). Since your vehicle's brake system is self-adjusting, there is no need for pedal adjustment. If the pedal to floor wall distance as measured above is less than the minimum distance required, have your vehicle inspected by your MARUTI SUZUKI dealer.

NOTE:

When measuring the distance between the brake pedal and floor wall, be sure not to include any floor covering in the measurement.

▲ WARNING

If you experience any of the following problems with your vehicle's brake system, have the vehicle inspected immediately by your MARUTI SUZUKI dealer.

- Poor braking performance
- Uneven braking (Brakes not working uniformly on all wheels.)
- Excessive pedal travel
- Brake dragging
- Excessive noise
- Pedal pulsation (Pedal pulsates when depressed.)
