

Single and Second-Stage LP-Gas Regulators

WARNING

Fisher equipment must be installed, operated, and maintained in accordance with federal, state, and local codes and Fisher instructions. The installation in most states must also comply with NFPA No. 54 and 58 standards.

Only personnel trained in the proper procedures, codes, standards, and regulations of the LP-gas industry should install and service this equipment. Failure to follow these instructions or to properly install and maintain this equipment could result in an explosion and/or fire causing property damage and personal injury or death.

Things To Tell The Gas Customer:

1. Point out the regulator's vent to the customer (or vent assembly or vent tube), and **stress that this opening must remain unobstructed at all times**. Tell the customer to be sure to check the vent opening after a freezing rain, sleet storm, or snow to make sure ice has not formed in the vent.
2. Show the customer the shutoff valve on the container. The customer should close this valve immediately if gas can be smelled, appliance pilot lights fail to stay on or appear higher than usual, or any other abnormal situation occurs.
3. Tell the customer to call your company to service the regulator. If the regulator vents gas or leak develops in the system, only qualified gas serviceman should install or service the regulator.

Introduction

Scope of Manual

This instruction manual covers installation and maintenance for the following single and second-stage LP-gas regulators: Types 912, R322 (integral two-stage), R352, R722, R922, R932, and S102L.

Figure 1. Typical Regulator Configurations

Description

All the regulators are designed for low pressure (inches of water column) vapor service and are not to be used for liquid service. Their outlet pressure setting is usually 11-inches w.c. (27 mbar).

Single-stage regulators (reducing container pressure to 11-inches w.c. (27 mbar)) are normally painted gray while second-stage regulators (reducing the outlet of a first-stage regulator to 11-inches w.c. (27 mbar)) are normally painted palm green. The units differ in construction and capacity rating.

Specifications

The Specifications Table lists the specifications for the regulators. Contact the factory if the regulators are to be used on any service other than LP-gas, natural gas, or air. Temperature limits are -20° to 160° F (-29° to 71° C). Second-stage regulators are limited to 20 psig (1.4 bar) inlet pressure and must be used with a first-stage regulator.

Installation

WARNING

All vents should be kept open to permit free flow of air into and out of the regulator. Protect openings against the entrance of rain, snow, ice formation, paint, mud, insects, or any other foreign material that could plug the vent or vent line.
