Mathematical Reviews ,2000 *Current Index to Journals in Education* ,2000 **British Education Index** ,2001 New Labour's Policies for Schools Jim Docking,2012-11-12 A sequel to Jim Docking s National School Policy which examined the Conservative Government s education reforms from 1979 onwards this text reviews New Labour s policies to improve pupils performance The contributors examine the evidence concerning standards in schools look at the main directions of government policy explore particular policies in detail and provide clear expositions of New Labour s education policies and provide critical examinations of controversial issues **The Times Index** ,2009 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement **Index to Theses with Abstracts Accepted for Higher Degrees by the Universities of Great Britain and Ireland and the Council for National Academic Awards** ,1999 Theses on any subject submitted by the academic libraries in the UK and Ireland **New Labour's Policies for Schools** ,2000 First Published in 2000 Routledge is an imprint of Taylor Francis an informa company The Culture of Change Peter Mortimore,2000 This is a comparative study of approaches to the challenge of improving achievement which focuses on two pairs of schools in London and Singapore They were chosen because they seemed to be achieving against the odds with pupils who were relatively disadvantaged in their society It is the schools successes and achievements in the face of adversity the strategies that enabled them to improve and the continuing challenges that they face that are described in this book by a research team comprising educational researchers business people and other professionals The book first explores the context of schooling

in Singapore and London showing the differences and similarities between the two education systems The research is presented as a series of case studies in the book s central chapters and it concludes with a discussion of the improvement strategies adopted by the schools in relation to their different cultural contexts The team found that many similar strategies were adopted by the principals of the four schools but the different contexts in which they were operating meant that similar actions did not always lead to similar results They conclude that there is no single way of achieving school improvement no simple recipe for turning round the kinds of schools exemplified in these case studies While common factors in improvement include motivating staff focusing on teaching and learning enhancing the physical environment and changing the culture of the school change cannot be imposed from outside the will and the effort to change must come from within Das Schweizer Buch ,1999 *Raising Achievement in Secondary Mathematics* Anne Watson,2006-06 This book argues for changed attitudes towards low attaining students in secondary mathematics Certain social groups regularly underachieve in mathematics so attainment is seen as an issue of social justice The way that assessment testing teaching and grouping decisions in mathematics can confirm a cycle of low attainment is carefully described with well founded arguments based on many years experience and research Anne Watson offers an alternative view of attainment and capability based on real classroom incidents in which low attaining students show themselves to be able to think about mathematics in quite sophisticated ways She argues that teaching could be based on learners proficiency rather than seen as correcting or confirming deficits in knowledge and behaviour She describes how a group of teachers who believed that their students could do better with higher expectations developed a range of principles and strategies which supported their work the students showed significant progress and the teachers felt they were doing a better job This book is for anyone who is in a position to challenge existing practice in mathematics teaching either in their own classroom or in the broader cultures of teaching It offers the arguments the knowledge and the support for changing practice in a non judgemental practical but well founded way **Abstracts of Papers Presented to the American Mathematical Society** American Mathematical Society,1998 **The Teaching Assistant's Guide to Literacy** Susan Elkin,2007-05-10
