Piracy Cultures Manuel Castells, Gustavo Cardoso EDS, 2013-02-25 *Piracy Cultures* Editorial Introduction MANUEL CASTELLS 1 University of Southern California GUSTAVO CARDOSO Lisbon University Institute ISCTE IUL What are Piracy Cultures Usually we look at media consumption starting from a media industry definition We look at TV radio newspapers games Internet and media content in general all departing from the idea that the access to such content is made available through the payment of a license fee or subscription or simply because its either paid or available for free being supported by advertisements or under a freemium business model That is we look at content and the way people interact with it within a given system of thought that sees content and its distribution channels as the product of relationships between media companies organizations and individuals effectively a commercial relationship of a contractual kind with accordant rights and obligations But what if for a moment we turned our attention to the empirical evidence of media consumption practice not just in Asia Africa and South

America but also all over Europe and North America All over the world we are witnessing a growing number of people building media relationships outside those institutionalized sets of rules We do not intend to discuss whether we are dealing with legal or illegal practices our launching point for this analysis is that when a very significant proportion of the population is building its mediation through alternative channels of obtaining content such behavior should be studied in order to deepen our knowledge of media cultures Because we need a title to characterize those cultures in all their diversitybut at the same time in their commonplacenesswe propose to call it Piracy Cultures

G.A.M.E. Games Autonomy Motivation & Education Menno Deen,2015-05-21 This thesis reviews and utilizes concepts from cognitive psychology developmental psychology and game design to bring forth a number of design principles for educational games that may improve students motivation to learn Its main contribution is a novel approach to serious game design namely envisioning play and learning as a restructuring practice This change of perspective from a formal game design approach focused on rules and regulations towards a more activity centered approach focused on process and style may help designers to leverage the motivational potential of games in order to make education more engaging to students
