CAFFEINE accomplishes its task by treating function induction as a tree search problem. It constrains its tree search space via a canonical functional form grammar and searches the space with grammatically constrained genetic programming. The second designer task is topology selection. Topology design tools must consider a broad variety of topologies such that an appropriate topology is selected, must easily adapt to new semiconductor process nodes, and readily incorporate new topologies. Topology design tools must allow designers to creatively explore new topology ideas as rapidly as possible.

Written by two well-known experts in the field with input from a broad network of industry specialists, the ROV Manual Second Edition provides a complete training and reference guide to the use of observation class ROVs for surveying, inspection, and research purposes. This new edition has been thoroughly revised and substantially expanded with nine new chapters, increased coverage of mid-sized ROVs, and extensive information on subsystems and enabling technologies. Useful tips are included throughout to guide users in gaining the maximum benefit from ROV technology in deep water applications. Intended for marine and offshore engineers and technicians using ROVs, the ROV Manual Second Edition is also suitable for use by ROV designers and project managers in client companies making use of ROV technology. A complete user guide to observation class ROV remotely operated vehicle technology and underwater deployment for industrial, commercial, scientific, and recreational tasks. Substantially expanded with nine new chapters and a new five-part structure separating information on the industry, the vehicle, payload, sensors, and other aspects. Packed with hard-won insights and advice to help you achieve mission results quickly and efficiently.
