The *Tutorials in Biostatistics* have become a very popular feature of the prestigious Wiley journal *Statistics in Medicine*. The introductory style and practical focus make them accessible to a wide audience including medical practitioners with limited statistical knowledge. This book represents the second of two volumes presenting the best tutorials published in *SIM* focusing on statistical modeling of complex data. Topics include clustered data, hierarchical models, mixed models, genetic modeling and meta-analysis. Each tutorial is focused on a medical problem, has been fully peer reviewed and edited, and is authored by leading researchers in biostatistics. Many articles include an appendix on the latest developments since publication in the journal and additional references. This will appeal to statisticians working in medical research as well as statistically minded clinicians, biologists, epidemiologists and geneticists. It will also appeal to graduate students of biostatistics.
