Kzn Economics Paper 1 Trial:

Youth Employment Programmes in Africa Ramos E. Mabugu, Lucas Ronconi, 2025-10-03 This book investigates youth employment programmes across nine African countries providing important insights into the world's youngest continent by population in which 60% of people are aged under 25. By 2050 the labour force in sub-Saharan Africa is expected to be almost double the size of the labour force in high income countries representing a massive shift in the world's working population and providing a significant challenge for job creation. In this book contributors bring together insights from more than 500 in depth interviews and 1 500 focus group participants to consider whether youth employment programmes are effectively reaching vulnerable groups. This book tackles the problem of political clientelism in the allocation of benefits and considers the level of coordination that is taking place across programmes and political institutions. Combining rich empirical findings with data about labour market outcomes and institutions this book will be an important read for researchers wishing to understand the political economy of youth employment policy in Africa. *Global Monitoring Report 2011*, 2011-01-01 Prepared jointly by The World Bank and the International Monetary Fund. *Genomics and Health in the Developing World* Dhavendra Kumar, 2012-05-11 *Genomics and Health in the Developing World* provides detailed and comprehensive coverage of population structures, human genomics and genome variation with particular emphasis on medical and health issues in the emerging economies and countries of the developing world.
