### **Financial Management in Construction Contracting** Andrew Ross, Peter Williams, 2013-01-29

Financial Management in Construction Contracting Andrew Ross Peter Williams This authoritative text provides a detailed insight into how construction companies manage their finances at both corporate and project level It guides students and practitioners through the complexities of the financial reporting of construction projects within the constraints of accepted accounting practice The book is written for non

accountants and from a contractor's perspective and is equally relevant to subcontractors and main contractors. The authors examine the relationship between the external annual accounts and the internal cost value reconciliation process. CVR is covered in depth and the authors consider issues such as interim payments, subcontract accounts, contractual claims, final accounts, cash flow management and the reporting of the physical and financial progress of contracts. A broad perspective of all the financial aspects of contracting is taken along with related legal issues and the authors explain how things operate in the real world. They describe good practice in financial control while at the same time being honest about some of the more questionable practices that can and do happen. The approach taken is unique as the financial management of construction projects is considered from the perspective of the contractor's quantity surveyor. The book deals with the real issues that surveyors have to address when using their judgment to report turnover, profitability, cash flow and work in progress on projects and the financial problems faced by subcontractors are frankly and pragmatically explored. The payment and notice requirements of the Construction Act are explained in detail and relevant provisions of JCT2011, NEC3, ICC, DOM 1 and other standard contracts and subcontracts are also covered. Financial Management in Construction Contracting addresses the wide variety of external factors that influence how construction companies operate including government policy, banking covenants and the financial aspects of supply chain management. Cost reporting systems are described and real life examples are used to illustrate cost reports, accrual systems and how computerised systems can be employed to provide the QS with information that can be audited. This is the ideal core text for final year degree and post graduate students and provides an invaluable reference source for all engaged in the financial management of construction projects. This book's companion website is at [www.wiley.com/go/rossfinancialmanagement](http://www.wiley.com/go/rossfinancialmanagement) and offers invaluable resources for both students and lecturers. PowerPoint slides for lectures on each chapter, Excel worksheets to practice what you learn, sample valuations and cashflows.

**MacRoberts on Scottish Construction Contracts** MacRoberts, 2014-11-17. Provides a guide to the general principles of Scottish law relevant to construction contracts and the main provisions of the standard forms of construction contract used in Scotland including the obligations of employers and contractors, certification, payment, ending a construction contract, remedies, subcontracts, collateral warranties, insurance, dispute resolution, regulatory matters. The new edition has been substantially updated and expanded to take account of the latest editions of the Scottish Standard Building Contracts and recent case law. Specific updates have been driven by the following changes to legislation and standard contracts: Local Democracy, Economic Development and Construction Act 2009 and the relative Scheme for Construction Contracts; Arbitration (Scotland) Act 2010. Recognising the significant increase in use of NEC3 standard forms of contract, references to NEC3 provisions have been introduced throughout the relevant chapters so that each now covers the common law, the SBCC provisions and the NEC3 provisions. It also features new chapters on litigation, competition, the Bribery Act 2010 and guarantees and bonds. From reviews of previous editions: very approachable and readable. I would particularly recommend

this book to non legal construction professionals Construction Engineering Law an informative textbook for the practitioner a significant contribution to knowledge Arbitration a highly competent textbook which would be of value for industry professionals with no legal background Construction Law     The Architect in Practice David Chappell,Michael H. Dunn,2016-01-26 Throughout its many editions The Architect in Practice has remained a leading textbook used in the education of architects While the content of the book has developed the message and philosophy has remained constant to provide students of architecture and young practitioners with a readable guide to the profession outlining an architect s duties to their client and contractor the key aspects of running a building contract and the essentials of management finance and drawing office procedure The eleventh edition follows in that tradition The text has been brought up to date to ensure it follows the new RIBA Plan of Work 2013 as the guide to the architect s workflow In addition a number of changes to standard forms of contract were made with the publication of the JCT 2011 suite of contracts and the RIBA Standard Form for the Appointment of an Architect 2010 2012 Revision These new forms are fully covered In addition the opportunity has been taken to reorganise the layout so that the content flows in a way that is more consistent with current architectural practice and to deal with the increasing use of BIM The eleventh edition of The Architect in Practice continues to provide the guidance and advice all students and practising architects need in the course of their studies and in their profession     **The JCT Standard Building Contract 2011** David Chappell,2014-01-08 Books about construction contracts tend to be dense andwordy but what most architects quantity surveyors projectmanagers builders and employers are looking for is an easilynavigable simple guide to using a contract written in plainlanguage The JCT Standard Building Contract 2011 is anuncomplicated book about a complex and commonly used contract Itstraightforwardly and concisely sets out exactly what the contractrequires in various circumstances as far as possible without legaljargon and without assuming any particular legal or contractualexpertise from the reader It explains often from firstprinciples exactly what is meant by a contract and why certainclauses such as extension of time clauses or liquidated damagesclauses are present and more importantly what they mean The bookis divided into many chapters each with many sub headings to makeit easy to read and to help readers to find relevant explanationsquickly Tables and flowcharts are used to ensure clarity and mostchapters include a section dealing with common problems Covers the recently issued JCT Standard Building Contract2011 Straightforward concise and as far as possible free of legaljargon Sets out exactly what the contract requires in variouscircumstances Includes many tables and flowcharts to ensure clarity     **Guide to JCT Standard Building Contract 2024** Sarah Lupton,Manos Stellakis,2025-07-01 The latest edition of the JCT Guide series provides a practical comprehensive overview of the 2024 JCT Standard Contract suite SBC Q SBC AQ and SBC XQ It organises and explains all provisions procedures and conditions by subject clearly outlining the obligations of various parties and addressing key contractual issues that may arise during a project supported by the most recent legislation and case law Key features of the 2024 edition Detailed analysis of the JCT
