

A high-angle, wide shot of a post-apocalyptic city. A winding river flows through a dense, green forest that has reclaimed the urban landscape. Several tall, modern skyscrapers are visible, their upper floors and spires partially obscured by thick vines and foliage. The scene is captured in a cinematic style with soft, natural lighting. In the foreground on the left, a tree branch with green leaves frames the view. The title 'LIFE AFTER PEOPLE' is written in large, bold, white, sans-serif capital letters across the lower half of the image. Below it, the words 'THE SERIES' are written in a smaller, similar font, flanked by two horizontal white bars.

the potential for dealing with invasive species may be more effective than elsewhere Moreover the fragility of its ecosystems makes it relatively easy to see the impact of one species upon another Nature and people shape the country's ecology from its geological and biological beginnings to the relatively recent arrival of people and the changes wrought to the wide ranging efforts of individuals and communities to protect and enhance treasured species and environments Among them an ambitious Predator Free 2050 initiative to rid the country of some of its unwanted species The issue is a complex and interesting one There are ethical considerations which species are protected and which destroyed How are they destroyed What are the unforeseen consequences There are also tensions between preservation and the use of natural resources and ultimately our relationship to the environment how we live A Land Before Humans a Land After Humans explores these issues An invaluable resource for environment ecology animal welfare and ethics students researchers and policy makers the book takes New Zealand as a case study and looks at the practical and ethical considerations of dealing with invasive species
