PLUMBING

Step 1: Slide flexible tubing over the barbed hose connectors of the pump and fix with hose clamps.

Step 2: Ensure the other ends of the tubing, coming from and going into the Pump are firmly fixed to their respective connectors, either to a tap or an outlet of a water tank.

Important when plumbing the Pump to the water system:

Use flexible hose only, of the correct pressure rating. The use of check valves in the plumbing system could interfere with priming ability of the pump. If a check valve is installed in the plumbing, it must have a cracking pressure of no more than 2psi (0.14 bar).

ELECTRICAL WIRING

Basic information on installing your pump is below but if in doubt seek professional advice from a 12 Volt specialist.

1. Disconnect all cables you are working on from the battery and make sure any cables are not live.

2. Install an on-off switch plus a fuse or a circuit breaker between the positive + terminal of the battery and the positive wire on the Pump.

3. The pump should be wired to a dedicated circuit, controlled by a switch rated at or above the fuse ampere rating indicated on the pump motor label.

4. To protect the system wiring and components, each pump should have a fuse installed that is relative to the individual pump's rated ampere

KICKASS

Congratulations you have just purchased a Kickass 12 volt water pressure pump. They come in four different models and are designed to pump water to taps and outlets in your caravan, boat, RV or camping site, shower etc. When installed correctly they are self-priming – which means they will start at the turn of a tap. This manual contains instructions on how to install and care for your Kickass pressure pump. We advise you to read this manual thoroughly in order to receive years of trouble-free use.

ABOUT KICKASS PUMPS

- Constructed from corrosion-resistant material, they can handle salt and fresh water.
- They have Thermal Overload Protection and soft-noise-absorbing mounts.
- They can be run-dry for short periods of time, without damage.
- They are not designed for continuous pumping such as filling a large water tank or watering a lawn.

MOUNTING

Select the best position for the pump

KickAss Pressure Pumps are best mounted horizontally to aid the self-priming feature. 'Vertical' mounting can sometimes adversely affect the self-priming feature of the Pump. If you need to mount the pump in a vertical position put the motor on the top, above the pump, see the diagram of the pump to the right. It is best to mount the Pump on a solid surface to prevent the sound of the Pump noise being increased.

Mounting the Pump in an enclosed space may need the addition of a cooling or a hot air extraction fan to keep the pump cool. If you mount the Pump outdoors it needs to be thoroughly protected from rain, dust, water and sunlight.

Important provide adequate ventilation

Inadequate ventilation can cause the pump motor to overheat, burnout and fail, voiding the warranty.

1

PRIMING 101

You will need to prime your KickAss Pressure Pump in the following situations.

- When it is used for the first time
- When it has not been used for a while eg. Van in storage
- When the water lines need flushing
- When you have a blockage caused by trapped air (known as an airlock)
- When maintenance or change of any other changes to the plumbing system are undertaken
- When connecting a new outlet tap to your existing system

KickAss Pressure Pumps once installed and primed for airlocks, become self-priming

When you run the pump for the first time ensure that the outlet pipe or any taps connected to it are open which will allow any air that is in the system to escape. Once there is no air left in the system the pump is primed and ready to go.

GENERAL CARE AND MAINTENANCE

- When correctly installed, run and maintained, KickAss Pumps can give years of trouble-free use
- After extended periods of disuse, follow the priming instructions
- Using the KickAss Pump continuously for extended periods will cause the pump to overheat and fail
- Overheating can result in permanent damage and voids the warranty.
- Before freezing weather conditions occur, the pump should be drained of water.
