Kpi Dashboard Tool Supply Chain Risk Management:

Managing Supply Chain Risk Sime Curkovic, Thomas Scannell, Bret Wagner, 2015-06-24 Risk management in supply chain logistics has moved from being a nice to have to a necessity due to the number of variables that can cripple a business. Managing Supply Chain Risk Integrating with Risk Management details the critical factors involved in managing supply chain risk. It discusses how managing supply chain risk can be integrated into *Handbook of Systems Engineering and Risk Management in Control Systems, Communication, Space Technology, Missile, Security and Defense Operations* Anna M. Doro-on, 2022-09-27 This book provides multifaceted components and full practical perspectives of systems engineering and risk management in security and defense operations with a focus on infrastructure and manpower control systems missile design space technology satellites intercontinental ballistic missiles and space security. While there are many existing selections of systems engineering and risk management textbooks, there is no existing work that connects systems engineering and risk management concepts to solidify its usability in the entire security and defense actions. With this book, Dr. Anna M. Doro-on rectifies the current imbalance. She provides a comprehensive overview of systems engineering and risk management before moving to deeper practical engineering principles integrated with newly developed concepts and examples based on industry and government methodologies. The chapters also cover related points including design principles for defeating and deactivating improvised explosive devices and land mines and security measures against kinds of threats. The book is designed for systems engineers in practice, political risk professionals, managers, policy makers, engineers in other engineering fields, scientists, decision makers in industry and government, and to serve as a reference work in systems engineering and risk management courses with focus on security and defense operations. Technology Forecast 2003/2005 is the latest in a series that the PricewaterhouseCoopers Global Technology Centre has published annually for more than a dozen years. This year's book provides in-depth coverage of enterprise applications and enabling software and forecasts significant developments in those areas over the next three years. It also contains information of particular interest to senior executives including CFO Perspectives for each of the chapters and a chapter on business reporting and XBRL. As the pace of business quickens, companies must eliminate information lag and make more timely decisions. Business intelligence technologies, business activity monitoring, event notification, and digital dashboards provide executives with real-time information about the status of key business processes, including their relations with customers and suppliers. New business integration technologies, including increased use of XML-based Web services, are making end-to-end automation of business processes easier to accomplish. Meanwhile, the incorporation of analytic capabilities into virtually all enterprise applications, as well as advances in knowledge management and collaborative technologies, increase the speed and effectiveness of decision making. Technology Forecast 2003/2005 discusses these and other changes under way in enterprise IT. It is divided into three sections, each highlighting a different area of enterprise software that together comprise ten chapters providing detailed coverage of specific technologies and applications. Enterprise Applications contains chapters on enterprise suites, including enterprise suite architectures, supply chain, event and performance management, and enterprise resource planning; customer-facing applications; and business intelligence and enterprise analytics, including real-time business intelligence and business activity monitoring. Information Management comprises chapters on enterprise content management, knowledge management, and e-learning and collaborative technologies. Enabling Software includes chapters on XML and Web services, component frameworks, including J2EE and Microsoft .NET, application and portal servers, and business integration technologies, including business process modeling, monitoring, and management. In addition, the book features interviews with three leading figures in IT: Vivek Ranadiv, Founder, chairman, and CEO of TIBCO Software, a recognized industry leader. Ranadiv was selected by InfoWorld as one of the top ten technology innovators in 2002. He was also recognized by Ernst & Young as a 2002 software entrepreneur of the year. His book, *The Power of Now: How Winning Companies Sense and Respond to Change Using Real-Time Technology* (McGraw-Hill, 1999), has been widely used as a business school textbook. Tony Scott, CTO for General Motors Information Systems and Services organization, where he is responsible for defining the enterprise architecture and standards across all of GM's global business. His work at GM has included the development of its employee portal and wireless strategy, and he directs the company's involvement in IT standards bodies and technology consortium organizations. Ronald Weissman, a venture partner with Apax Partners, a leading international private equity and venture capital firm with offices throughout Europe, the United States, Israel, and Japan. Apax manages more than \$12 billion on behalf of major institutional investors in the United States and abroad. His focus is on U.S. and international opportunities in enterprise and infrastructure software and on Apax portfolio company development.
