Identifying possible causes of business distress is now recognised as an important agenda item. Creating the capacity to bounce back from such distress, business resilience, has become a priority. The authors blend their own practical experience, academic research, and a systematic analysis of recent high profile cases including Flybe Group Plc, Arcadia Group Ltd, Carillion Plc, NMC Health Plc, and Thomas Cook Group Plc in a review of potential causes of business distress and key resilience drivers. This is presented in detail in separate chapters covering business purpose, board effectiveness, the quality of strategic planning, financial stewardship, risk management, business turnaround strategies, and director duties in times of business distress. The book sets out a practical benchmarking framework in the form of a toolkit with a series of detailed evidences, performance indicators that companies can use to assess potential business distress and build a resilient company.
