

Experiment 1.1 Names of Chemical Reactions

Purpose:

The objectives of this laboratory experiment are to observe a variety of chemical reactions, to identify and explain observations with balanced chemical equations, and to classify each reaction as one of the four main types: synthesis, decomposition, single replacement, and double replacement/neutralization.

Introduction:

In this laboratory experiment, you will perform five reactions of chemical reactions. Some have no observable change, others provide product and write a balanced equation for each reaction. Using indicators like color, temperature, and gas tests that demonstrate products and the classification of different types of reactions.
