#### **Part 2 – Write a Summary of Your Hypothesis Statement**

Write a 250-word description of your final hypothesis statement. Describe the independent and dependent variables, and describe how you would objectively define a measurable, testable, replaceable, and meaningful hypothesis. How is your hypothesis measurable? How will you test it?

The hypothesis studies the possible benefits that telehealth could have. It could be a solution to the problem of the elderly not being able to get to medical appointments safely. The hypothesis is testable because it can be examined in data collection and analysis. The hypothesis can be replaceable if the data doesn't support an 80% reduction or other alternatives for healthcare being improved. This hypothesis is meaningful because it speaks to an important healthcare challenge that is faced by the elderly community.

Self-driving cars could greatly reduce traffic and accidents that drivers may cause. By implementing self-driving vehicles, there is a 50% reduction in traffic congestion and traffic-related fatalities. The hypothesis is testable because it examines the data that compares traffic congestion and accidents on the road. This is a meaningful hypothesis because if data support it, it can suggest that implementing self-driving vehicles can improve transportation, leading to better roads. If it's measurable, the study can involve self-driving vehicles in a certain area, and another area can be human-driven vehicles and see how the traffic and or accidents compare.
