Evolution of Information Technology in Educational Management Arthur Tatnall, Adrie J. Visscher, Andrew Finegan, Christopher O'Mahony, 2009-04-01 Evolution of Information Technology in Educational Management As the editors of this volume we are very happy to publish a selection of the papers that were presented at the eighth Conference of Working Group 3.7 of the International Federation for Information Processing which was held in July 2008. The focus of Working Group 3.7 is on ITEM Information Technology in Educational Management for more information please visit our website <http://item.wceruw.org> and the theme of its 2008 conference was on the Evolution of Information Technology in Educational Management. Our Working Group started its activities officially; we were not an IFIP Working Group at that time in 1994 in Israel so it made sense to look at how ITEM has evolved over the years and to reflect on what its future may be. The conference took place in Darwin, northern Australia, which even during the Australian winter is a very pleasant location for having a conference. The town of Darwin was given its name by the Captain of the Beagle, the ship on which Darwin travelled when he made the investigations on which he based his Theory of Evolution, who came to the area and named the town after the giant of science he admired. *A Dictionary of Education* Susan Wallace, 2008 Education is of relevance to everyone but it involves a specialised vocabulary and terminology which may be opaque or unfamiliar to those new to the field.
