control international migration Applying Max Weber's theories of legitimacy it determines that while states have certain traditionally legitimate functions migration control as distinct from the determination of citizenship is not one such function Measures of migration control must thus be justified on a rational legal basis that is on a minimal evidential basis Acknowledging the many obstacles states face in carrying out this legitimising exercise it is suggested that a supranational approach at the regional level is the most sustainable long term model with an ultimate aim of achieving inter regional cooperation on migration management on the basis of equality between regions
