

Metals in Aqueous Solutions Simulations

How to use it

Some elements are more reactive than others, meaning that they can more easily be broken apart into their ions than others. These are listed in their place respectively in "less" boxes. Other elements are less reactive and more likely to be found as pure elements, not in a compound. This simulation will allow you to test various combinations of elements and compounds, to see if a reaction of elements, in other words, occurs. It also has a button to see if a reaction will actually occur. Some reactions involving unreactive substances are also shown as a comparison. Some reactions involving all reactive elements are also shown as a comparison. Some reactions involving all reactive elements are also shown as a comparison. Some reactions involving all reactive elements are also shown as a comparison.

Objectives

Use the results of the simulation program to determine the activity series for the elements shown in the simulation.

Procedure

For this, the simulation at <https://www.ck12.org/chemistry/elements-in-aqueous-solutions-simulation/> and complete parts of the FOCUS activities (Activity 1, 2, and 3) Observations section, recording the appropriate information and answering the questions below.
