Ashdown,2007-04-11 The basic concepts behind sizing systems currently used in the manufacture of ready to wear garments were originally developed in the 19th century These systems are frequently based on outdated anthropometric data they lack standard labelling and they generally do not accommodate the wide variations of body sizes and proportions that exist in the population However major technological improvements have made new population data available worldwide with the potential to affect the future of sizing in many ways New developments in computer aided design and sophisticated mathematical and statistical methods of categorizing different body shapes can also contribute to the development of more effective sizing systems This important book provides a critical appreciation of the key technological and scientific developments in sizing and their application The first chapter in the book discusses the history of sizing systems and how this has affected the mass production of ready to wear clothing Chapters two and three review methods for constructing new and adapting existing sizing systems and the standardisation of national and international sizing systems Marketing and fit models are reviewed in chapter four whilst chapter five presents an analysis of the grading process used to create size sets Chapters six and seven discuss fit and sizing strategies in relation to function and the communication of sizing Mass customization and a discussion of material properties and their affect on sizing are addressed in chapters eight and nine Military sizing and the aesthetics of sizing are detailed in chapters ten and eleven The final chapter reviews the impact on sizing of production systems and specifications Written by an international team of contributors this book is an essential reference to researchers designers students and manufacturers in the clothing and fashion industry Provides a critical appreciation of key technological and scientific developments in sizing and their application Discusses how developments in sizing affect the mass production of ready to wear clothing Reviews methods of constructing new and adapting existing sizing

systems Metric Pattern Cutting for Children's Wear and Babywear Winifred Aldrich, 2012-06-27 This fourth edition of Metric Pattern Cutting for Children's Wear and Babywear remains the standard text book but has three major improvements First the sections have been re organised to reflect changes in producing and marketing children's clothes Today's popularity of easy fitting styles and knitted fabrics means that basic flat pattern cutting is used to construct the majority of children's wear and babywear and this type of cutting is therefore emphasised in this new edition Shaped blocks and garments cut to fit the body form are still included and are placed in chapters covering some school uniform garments or more expensive fashion or formal clothes The book now clearly separates the sections useful to student beginners Parts One Two and Three and also offers more advanced or specialist sections for students who wish to pursue a career in children's wear or for designers working in the different manufacturing sectors of the trade The second change in this fourth edition is the introduction of colour coding to the sections this makes it easier to identify specific processes in the book and enhances the illustrations Finally the size charts have been revised to reflect the changes in body sizing The clear division of the boys and girls measurements in the charts has been in response to the way clothes are marketed and to co ordinate with European size charts Plus charts for heavier children have also been added **Metric Pattern Cutting for Children's Wear and Babywear** Winifred Aldrich, 1999-09-15 Hundreds of stylish illustrations and clear concise instructions are used to illustrate this flexible system of pattern cutting offering both students and designers the means to achieve original well cut designs The children's clothing market has changed remarkably during the last decade and this standard work has been totally revised and rewritten to reflect new developments including the increasing importance of knitted fabrics and the fashion consciousness of today's mothers **Textiles** ,1991 **Cutter's Research Journal** ,1999 **Apparel International** ,1997
