

METRO VANCOUVER TRANSIT POLICE

RECRUIT POLICE OFFICER – EMPLOYMENT APPLICATION

AZ020

APPLICANT SELECTION AND FEEDBACK FORM

Dear Applicant:

You are competing in a highly competitive process designed so you can prove your abilities. Our objective is to select individuals we believe are the best qualified to provide policing service in Metro Vancouver, now and for the future.

The process is lengthy and at each step, a minimum level of achievement must be met. However, even if you meet this minimum standard, the Recruiting Unit must still determine which applicants are the best qualified to proceed for further testing. This decision will be based on the qualifications of the applicants, how many testing spaces are available at each step, and on how many police officers we expect to hire. To reiterate, even if you meet our minimum standard of performance, you may not be selected to proceed to the next step of testing due to the number of other more qualified applicants in the process.

We encourage you to keep other career options open and to manage your life based on the fact you may not achieve your goal of becoming a police officer with the Metro Vancouver Transit Police. If you are advised after a testing step that others are more competitive, please remember that due to the volume of qualified applicants, the reason has less to do with you and more to do with others. This volume also means that we do not have the resources to meet with unsuccessful applicants, nor are we able to provide specific feedback to these individuals when they are not selected to continue in our process.

These words may sound discouraging to you. However, we prefer to be as direct as possible so that you know what is involved in the process. If you do not accept these conditions, please do not enter our testing process so that our significant investment of time, resources and staff can be allocated toward other more committed applicants.

I understand and accept that I cannot be provided with feedback if I am unsuccessful in my application to become a police officer with the Metro Vancouver Transit Police.

Cyber Criminology Hamid Jahankhani, 2018-11-27 This book provides a comprehensive overview of the current and emerging challenges of cyber criminology victimization and profiling It is a compilation of the outcomes of the collaboration between researchers and practitioners in the cyber criminology field IT law and security field As Governments corporations security firms and individuals look to tomorrow s cyber security challenges this book provides a reference point for experts and forward thinking analysts at a time when the debate over how we plan for the cyber security of the future has become a major concern Many criminological perspectives define crime in terms of social cultural and material characteristics and view crimes as taking place at a specific geographic location This definition has allowed crime to be characterised and crime prevention mapping and measurement methods to be tailored to specific target audiences However this characterisation cannot be carried over to cybercrime because the environment in which such crime is committed cannot be pinpointed to a geographical location or distinctive social or cultural groups Due to the rapid changes in technology cyber criminals behaviour has become dynamic making it necessary to reclassify the typology being currently used Essentially cyber criminals behaviour is evolving over time as they learn from their actions and others experiences and enhance their skills The offender signature which is a repetitive ritualistic behaviour that offenders often display at the crime scene provides law enforcement agencies an appropriate profiling tool and offers investigators the opportunity to understand the

motivations that perpetrate such crimes This has helped researchers classify the type of perpetrator being sought This book offers readers insights into the psychology of cyber criminals and understanding and analysing their motives and the methodologies they adopt With an understanding of these motives researchers governments and practitioners can take effective measures to tackle cybercrime and reduce victimization *Official Report of the Standing Committees* Great Britain.
