Jw Kids 2014 Convention:

Proceedings of the 18th European Conference on Game-Based Learning Helga Dis Isfold Sigurdardottir, Robin Isfold Munkvold, **Handbook of Children's Rights** Martin D. Ruck, Michele Peterson-Badali, Michael Freeman, 2016-12-08 While the notion of young people as individuals worthy or capable of having rights is of relatively recent origin over the past several decades there has been a substantial increase in both social and political commitment to children's rights as well as a tendency to grant young people some of the rights that were typically accorded only to adults In addition there has been a noticeable shift in orientation from a focus on children's protection and provision to an emphasis on children's participation and self-determination With contributions from a wide range of international scholars the Handbook of Children's Rights brings together research theory and practice from diverse perspectives on children's rights This volume constitutes a comprehensive treatment of critical perspectives concerning children's rights in their various forms Its contributions address some of the major scholarly tensions and policy debates comprising the current discourse on children's rights including the best interests of the child evolving capacities of the child states rights versus children's rights rights of children versus parental or family rights children as citizens children's rights versus children's responsibilities and balancing protection and participation In addition to its multidisciplinary focus the handbook includes perspectives from social science domains in which children's rights scholarship has evolved largely independently due to distinct and seemingly competing assumptions and disciplinary approaches e.g. childhood studies developmental psychology sociology of childhood anthropology and political science The handbook also brings together diverse methodological approaches to the study of children's rights including both quantitative and qualitative perspectives and policy analysis This comprehensive cosmopolitan and timely volume serves as an important reference for both scholarly and policy-driven interest in the voices and perspectives of children and youth *International Parental Child Abduction and the Law* Geraldine Carney, 2024-06-13 Japan has faced widespread scrutiny for failing to properly address international parental child abduction involving its citizens This book examines how and why Japan has come to have this tarnished image its response and how it might manage these disputes in the future In particular the book explores how Japan engages with international legal frameworks to manage international parental child abduction and what this means in reality for Japanese people and others who come under its wide umbrella A focus of this examination is how the key international treaty the Hague Convention of 25 October 1980 on the Civil Aspects of International Child Abduction has fared since being introduced in Japan in 2014 Case studies of parental child abduction involving Japan are used throughout to illustrate the legal and social concepts discussed in the book The struggles of both abducting and left behind parents across fluid international borders reveal seismic social and philosophical shifts in Japan that continue to shape its legal landscape This book will be a useful resource for students of Japanese Studies Sociolegal Studies Comparative Law and International Law Design for Education Ana Rute Costa, Rachel Cooper, 2024-07-31 This

book charts the impact of design on education specifically focusing on how design can shape the spaces and tools for learning This edited collection brings together the work of designers architects engineers professionals educators and researchers and presents a series of case studies and research developed from across Europe North America South America Africa Australia and Asia The book provides the tools to develop innovative approaches to design for education and illustrates the conversation and action required to foster socially responsible design for education As the contributions show we must look at education as an input and output of a complex system and we need to adopt an interdisciplinary multiple stakeholder approach bringing together experts from a range of different fields and backgrounds as a cohesive strategy to improve future learning and teaching environments Providing guidance and a theoretical framework for designing spaces and tools for learning this book will be a useful resource for design and architecture students as well as practitioners educational researchers educational practitioners policymakers and behaviour and built environment researchers

Accounting at War
 Warwick Funnell, Michele Chwastiak, 2015-03-24 Accounting is frequently portrayed as a value free mechanism for allocating resources and ensuring they are employed in the most efficient manner Contrary to this popular opinion the research presented in *Accounting at War* demonstrates that accounting for military forces is primarily a political practice Throughout history military force has been so pervasive that no community of any degree of complexity has succeeded in Through to the present day for all nation states accounting for the military and its operations has primarily served broader political purposes From the Crimean War to the War on Terror accounting has been used to assert civilian control over the military instill rational business practices on war and create the visibilities and invisibilities necessary to legitimize the use of force *Accounting at War* emphasizes the significant power that financial and accounting controls gave to political elites and the impact of these controls on military performance *Accounting at War* examines the effects of these controls in wars such as the Crimean South African and Vietnam wars *Accounting at War* also emphasizes how accounting has provided the means to rationalize and normalize violence which has often contributed to the acceleration and expansion of war Aimed at researchers and academics in the fields of accounting accounting history political management and sociology *Accounting at War* represents a unique and critical perspective to this cutting edge research field

Cyberbullying and Sexting
 Elizabeth Agnew, 2024-02-08 Drawing on two empirical studies and influential theoretical frameworks this book provides a critical overview of the key regulatory challenges concerning cyberbullying and sexting behaviours among young people persons under 18 years The author explores issues such as conceptualising the behaviours examining the prevailing presence of sexism myths and stereotypes surrounding gender roles and identity and the limitations of criminal law as an effective regulatory tool In doing so identifying peer based sexting behaviours as part of a continuum of sexual behaviour is promoted alongside the need to consider interventions beyond the legal landscape and in line with the United Nations Convention on the Rights of the Child In the main priority is given to non legal responses and the need for more effective and

comprehensive gender sensitive education programmes The book therefore provides a more developed conceptual understanding of sexting and cyberbullying behaviours among young people The Railroad Telegrapher ,1960
