

CARVIN

THE SX SERIES

The Breakthrough
in Guitar Amplification

"I was immediately impressed with the clean sound of this amp, ranking it with the best I've heard... The Distortion? It's very, very good—and this is coming from a dedicated tube amp man... this is a remarkable amp! I can't think of a single thing that could be done to improve its performance... a best buy."

David Hicks, *Guitar Player Magazine*

"Carvin should be very happy with the SX Series of amplifiers... This distortion circuit is going to turn some heads in the guitar community... the sounds created by this tube simulator circuit are some of the warmest, richest and longest sustaining... I would suggest finding one... and plugging in..."

H.G. La Torre, *Music & Sound Output*

CARVIN

Welcome to the next step in guitar amplification—the SX Series by Carvin. Five different models, each designed to give you optimum performance and flexibility in whatever application you have. The SX Series stands as the first and only solid state amplifier family to truly capture the essential tone and character of tube distortion, thanks to the real innovation in solid state technology—the acclaimed Tube Simulator Circuit, designed by Carvin.
