Audiovisual Guide ,1936 *A Wayside Shrine in Northern Moab: Excavations in the Wadi ath-Thamad* P. M. Michele Daviau,Margreet L. Steiner,2017-08-31 Major recent excavations have shed much light on the complexity of Iron Age society and religion in southern Palestine a region where both Judeans and Edomites lived However it is not clear whether the religious practices attested at these sites were a reflection of localised customs or were common rituals for peoples of Cisjordan and we do not know their extent An isolated shrine site at Wadi ath Thamad Site WT 13 in northern Moab which contained numerous finds of Iron Age figurines and statues has been the subject of detailed excavation The rich harvest of figurines ceramic statues beads miniature ceramic vessels architectural models faunal remains and shells and fossils constitutes the evidence for repeated cultic activities Although dating to the Iron Age at the time of the consolidation of the kingdom of Moab there is insufficient evidence at present to determine the full range of cultic practices and deities venerated by the peoples of the lands within ancient Moab and by those visitors to the shrine The links between WT 13 and the surrounding town sites is only now coming to light with excavation at Atarus and Khirbat al Mudayna as well as at the Ammonite site of Tall Damiyah in the Jordan Valley where a comparable shrine has recently been uncovered WT 13 clearly serves as a link between the Jordan Valley and the Negev adding to our knowledge of local and foreign influences in the region during the Iron Age **Surveying** Barry F. Kavanagh,2004 This fifth edition of Surveying with Construction Applications begins with a firm foundation in the principles of surveying then supports this with real world construction applications Coverage reflects the latest developments and includes in depth discussions of more traditional topics
