

The LNL-200XA Power Supply Unit (PSU)

The LNL-200XA is a high-efficiency and cost-effective power supply designed to house a Lenel controller and reader interface module in an OnGuard® system.

Featuring a regulated 13.8 VDC output, the LNL-200XA supplies continuous full rated current to load. Maximum battery life is assured using deep discharge protection to prevent premature battery failure when operating in standby mode for extended periods. Two sets of volt-free contacts are provided to signal (i) loss of mains and (ii) battery and loss of output faults.

The LNL-200XA can supply a continuous full-rated current to load plus an additional 0.5A for charging a 12V standby battery.

The universal mains input voltage enables the power supply to be used across a wide geographical area. The highly efficient switch mode design ensures low operating costs while generating less heat. The modular construction simplifies maintenance.
