Methodological Nationalism Anna Amelina,2012 This volume strives to establish a new agenda for methodologies in the social sciences summarizing the most important research strategies developed in the social sciences since the early globalization and transnationalization studies of the 1980s and 1990s namely the cosmopolitan approach the transnational lens the scalar approach and global and multi sited ethnography The contributions go beyond the early criticisms of methodological nationalism providing insights into new strategies and illustrating how scholars apply these research strategies in different fields such as migration research and social anthropology Analyzing the advantages and lacunae of new research strategies helps both to outline general methodological directions and to provide helpful guides for empirical analysis *Weinhold Pamphlets: German Literature of 18th Century* ,1894 **The Petronian Society Newsletter** ,1970
