analyzed the histories of all twenty eight companies in the study After sifting through mountains of data and thousands of pages of interviews Collins and his crew discovered the key determinants of greatness why some companies make the leap and others don't The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice The findings include Level 5 Leaders The research team was shocked to discover the type of leadership required to achieve greatness The Hedgehog Concept Simplicity within the Three Circles To go from good to great requires transcending the curse of competence A Culture of Discipline When you combine a culture of discipline with an ethic of entrepreneurship you get the magical alchemy of great results Technology Accelerators Good to great companies think differently about the role of technology The Flywheel and the Doom Loop Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap Some of the key concepts discerned in the study comments Jim Collins fly in the face of our modern business culture and will quite frankly upset some people Perhaps but who can afford to ignore these findings
