Advances in Physical Ergonomics and Human Factors: Part I Tareq Ahram, Renliu Jang, 2018-07-19 The discipline of human factors and ergonomics HF E is concerned with the design of products process services and work systems to assure their productive safe and satisfying use by people Physical ergonomics involves the design of working environments to fit human physical abilities By understanding the constraints and capabilities of the human body and mind we can design products services and environments that are effective reliable safe and comfortable for everyday use This book focuses on the advances in the physical HF E which are a critical aspect in the design of any human centered technological system The ideas and practical solutions described in the book are the outcome of dedicated research by academics and practitioners aiming to advance theory and practice in this dynamic and all encompassing discipline A thorough understanding of the physical characteristics of a wide range of people is essential in the development of consumer products and systems Human performance data serve as valuable information to designers and help ensure that the final products will fit the targeted population of end users Mastering physical ergonomics and safety engineering concepts is fundamental to the creation of products and systems that people are able to use avoidance of stresses and minimization of the risk for accidents

Dynamic Positioning for Engineers Surender Kumar, 2020-10-28 Dynamic Positioning for Engineers enables the reader to acquire the basic knowledge of the concepts and understanding of the dynamic positioning DP system from the systems perspective This book illustrates the system subsystems and components of the DP system to better tackle maintenance problems and breakdowns leading to an increased mean time between failures and effective fault finding on dynamic positioning DP related equipment Overall this text will help professionals reduce downtime and higher repair costs Aimed at onboard electrical engineers engine room watch officers chief engineers DP professionals onboard in onshore officers and those taking DP training courses this book Explains automation and its application in the DP system Describes environmental sensors and position reference sensors as important inputs to the DP system Includes chapters on power management and thrusters Aids engineers in maintaining a the DP system in good operational condition Interdisciplinary Mechatronics M. K. Habib, J. Paulo Davim, 2013-05-06 Mechatronics represents a unifying interdisciplinary and intelligent engineering science paradigm that features an interdisciplinary knowledge area and interactions in terms of the ways of work and thinking practical experiences and theoretical knowledge Mechatronics successfully fuses but is not limited to mechanics electrical electronics informatics and intelligent systems intelligent control systems and advanced modeling intelligent and autonomous robotic systems optics smart materials actuators and biomedical and biomechanics energy and sustainable development systems engineering artificial intelligence intelligent computer control computational intelligence precision engineering and virtual modeling into a unified framework that enhances the design of products and manufacturing processes Interdisciplinary Mechatronics concerns mastering a multitude of disciplines technologies and their interaction whereas the

science of mechatronics concerns the invention and development of new theories models concepts and tools in response to new needs evolving from interacting scientific disciplines The book includes two sections the first section includes chapters introducing research advances in mechatronics engineering and the second section includes chapters that reflects the teaching approaches theoretical projects and laboratories and curriculum development for under and postgraduate studies

Mechatronics engineering education focuses on producing engineers who can work in a high technology environment emphasize real world hands on experience and engage in challenging problems and complex tasks with initiative innovation and enthusiasm
