

MICROECONOMICS

OVERVIEW

• **ECONOMICS:** The study of how scarce resources are allocated among competing uses.

• **KEY ECONOMIC QUESTIONS INCLUDE:**

1. What is produced?
2. How is it produced?
3. Who gets what is produced?

• **PRODUCTION POSSIBILITY FRONTIER:**

The alternative combinations of final goods and services that could be produced in a given time period with all available and limited resources and technology.

1. **Illustrates opportunity cost:** Obtaining more production of one good requires a reduction in the production (lost opportunity) of one or more other goods.

2. **Law of increasing opportunity cost:** Obtaining more of a good in equal amounts requires giving up ever larger amounts of the alternative good.

3. **Inside frontier:** Unemployed resources or resources used inefficiently.

4. **Expanding frontier:** Occurs (a) when resources are increased and/or (b) due to technological advancements.

• **HOW CHOICES ARE MADE:**

1. **Market mechanism:** Supply and demand determine the price; owners allocate resources to obtain the highest monetary rewards.

2. **Command economy:** Central authority determines the price and allocates resources to achieve goals.

3. **Mixed:** An economy that uses both market and non-market signals to allocate goods and resources.

• **MACROECONOMICS:** The study of economic aggregates such as national production and the price level.

• **MICROECONOMICS:** The study of the behavior of consumers and producers operating in the individual markets of the economy.

SUPPLY & DEMAND

DEMAND

• **DEMAND CURVE (SCHEDULE):** A curve (table) showing the quantities of a good a consumer is willing and able to buy at alternative prices.

• **LAW OF DEMAND:** Increase in price (P) causes decrease in quantity (Q) demanded.

• **CHANGE IN QUANTITY DEMANDED:** (Movement along the demand curve) Caused by a change in the price of the given good.

• **CHANGE IN DEMAND:** (Shift in the entire demand curve) Results from changes in tastes, income, personal tastes, prices of related goods (substitutes or complements), expected future price or quantity, number of buyers, or a change in planned consumption at all prices.

SUPPLY

• **SUPPLY CURVE (SCHEDULE):** A curve (table) showing the quantities of a good a seller is willing and able to sell at alternative prices at a given cost of production.

• **LAW OF SUPPLY:** Increase in price (P) causes increase in quantity (Q) supplied.

• **CHANGE IN QUANTITY SUPPLIED:** (Movement along the supply curve) Caused by a change in the price of the given good.

• **CHANGE IN SUPPLY:** (Shift in the entire supply curve) Results from change in the cost of production, business taxes, expected future price or quantity, change in the price of other produced goods, change in the number of sellers, change in planned sales at all prices, and change in technology.

MARKET EQUILIBRIUM

• **EQUILIBRIUM:** Occurs at price (P_e)

where quantity demanded = quantity supplied. At P_e, all sellers willing to sell will be able to sell and all buyers willing to buy will be able to buy.

• **PROPERTIES OF EQUILIBRIUM:**

1. P > P_e, surplus
2. P < P_e, shortage
3. P = P_e, stable

• **PRICE CONTROLS:**

1. Price ceiling: BELOW equilibrium = shortage, Q_d > Q_s

2. Price floor: ABOVE equilibrium = surplus, Q_s > Q_d

• **CHANGES IN EQUILIBRIUM:** Equilibrium price (P_e) and equilibrium quantity (Q_e) will change whenever the regularly-shaped supply or demand curve shifts.

SHIFTS IN THE SUPPLY & DEMAND CURVES (IMPACT ON EQUILIBRIUM)

SUPPLY INCREASE

$$S_1 \rightarrow P^*, Q^*$$

SUPPLY DECREASE

$$S_1 \rightarrow P^*, Q^*$$

DEMAND INCREASE

$$D_1 \rightarrow P^*, Q^*$$

DEMAND DECREASE

$$D_1 \rightarrow P^*, Q^*$$

SIMULTANEOUS SHIFTS (IMPACT ON EQUILIBRIUM)

* One variable clearly moves in a specific direction, the other variable is unclear.

At 2B and 2D, P* clearly increases or decreases, therefore

$$2B \rightarrow S_2(D) \rightarrow P^*(Q)^?$$

$$2D \rightarrow S_2(D) \rightarrow P^*(Q)^?$$

At 2A and 2C, Q* clearly increases or decreases, therefore

$$2A \rightarrow S_2(D) \rightarrow P^*(Q)^?$$

$$2C \rightarrow S_2(D) \rightarrow P^*(Q)^?$$

CONSUMER CHOICE & PREFERENCE

UTILITY THEORY

• **UTILITY or TOTAL UTILITY (TU)** is the satisfaction obtained by the consumer from consuming a good.

• **MARGINAL UTILITY (MU)** is the extra utility from an additional unit of consumption.

TOTAL UTILITY

• Marginal utility (MU) is the slope of the total utility curve. MU decreases as more quantity is consumed. This is the law of diminishing MU.

• **LAW OF DIMINISHING MARGINAL UTILITY:** Additional consumer satisfaction from the last unit of consumption falls as more of the good is consumed.

INDIFFERENCE CURVE (IC)

• An indifference curve is a convex curve that represents different bundles of goods that provide the SAME levels of utility.

INDIFFERENCE CURVE MAPPING

• An indifference curve map shows a group of indifference curves representing utilities that increase in a northeasterly direction.

• Why indifference curves do not intersect:

1. Given two indifference curves that intersect, U_B > U_C since point B is above point C.

2. Since point A and C are on the same indifference curve, U_A = U_C.

3. Since point A and B are on the same indifference curve, U_A = U_B.

4. By transitivity, U_B = U_C which conflicts with the initial assertion: U_B > U_C. Therefore, indifference curves cannot intersect.

A Guide to Historical Literature Henry Robinson Shipman, Sidney Bradshaw Fay, Augustus Hunt Shearer, William Henry Allison, 1936 **Guide to Literature of Home and Family Life** Annie Isabel Robertson, 1924 **Introducing Anthropological Economics** Sujay Rao Mandavilli, This paper attempts to merge the concepts and theoretical frameworks of the disciplines of Anthropology and Economics and attempts to create a new sub field in Economics called Anthropological Economics which is mired in Anthropological concepts and principles and seeks to maximize not only human welfare and happiness but also wealth maximization across cultures while considering both the psychic unity of man universal human needs and culture specific factors Thus Anthropological Economics is expected to be inter related to other disciplines of Economics but remain complementary to them i e it is not expected that it will intrude into other sub fields of economics replace them or override their principles in any way It will therefore draw upon other aspects of economic theory and enrich them suitably It is therefore expected that all aspects of Economic theory will be taken into consideration for policy formulation and decision making including those of Anthropological economics and independent context specific judgment will always be applied The new proposed field of Anthropological Economics proposes to take the idea of Human Welfare to its logical conclusion by extending the work already carried out in various sub disciplines of economics and integrating it more tightly with various concepts in Anthropology Many new tools and techniques are therefore proposed as a part of this paper and we believe these will suitably enrich the field of Economics as well While many attempts have been made in the past to integrate the fields of Anthropology and Economics we hope this endeavour will take this exercise to a much higher level by creating a new generation of Anthroeconomists We also hope it will eventually help move mainstream economics away from Neo classical approaches to Anthropological and human centric approaches **Book Review Digest** ,1917
