Level Sociology Predictions 2014:

Sociology, Curriculum Studies and Professional Knowledge David Guile, David Lambert, Michael J. Reiss, 2017-08-07 This volume brings together an international set of contributors in education research policy and practice to respond to the influence the noted academic Professor Michael Young has had on sociology curriculum studies and professional knowledge over the past fifty years and still has on the field to this day It provides a critical analysis of his work and the uses to which it has been put in the UK and internationally discussing implications for debates on the purpose of education and how school curricula as well as programmes in other educational settings could be run and teaching undertaken based on his contribution Following Michael's long and distinguished career dating back to before Knowledge and Control New Directions for the Sociology of Education which Michael edited in 1971 recent years have seen an upsurge in both academic and policy interest in his work including the new concern he expressed for knowledge in his 2007 book Bringing Knowledge Back In The book concludes with an appreciation and a response to the authors from Michael Young and a Coda from Charmian Cannon who was on the Institute of Education panel that appointed Michael to his post in 1967 This timely book is a unique critique and celebration written by experts whose own careers have been affected by Michael and will appeal to all those with an interest in the work of Michael Young

Guns and Contemporary Society Glenn H. Utter, 2015-12-01 This three volume set examines various approaches to firearms including constitutional and legal issues public health and criminal justice concerns and perspectives on personal safety and self defense Recent mass shootings have led to renewed calls for additional legislation at the state and federal levels to address gun access and control In this hard hitting compilation experts delve into various aspects of firearms in America from gun control and gun rights to militia movements to school related shootings and to the recent trends in gun ownership by women Authors from varied backgrounds and viewpoints share their perspectives on the pros and cons of firearm ownership as all of the following a constitutional right a key instrument of self defense a guarantee of political freedoms and as a major factor in crime and personal injury The reference is divided into three volumes The first volume covers firearm history legislation and policy the second volume explores public opinion gun ownership trends international laws and self defense and the third considers popular debates about firearm policy including concealed carry of firearms terrorism and the ownership of firearms background checks for purchasing guns and stand your ground laws The work concludes with an informed debate on gun policy between Richard Feldman president of the Independent Firearm Owners and Paul Helmke former president of the Brady Campaign to Prevent Gun Violence

Stand Out from the Crowd Eleanor Loughlin, Laura Dorian, 2019-10-10 This book takes a hands on approach to skills development and will help your students to stand out from the crowd both during their studies and when applying for jobs It supports students in the development of key organisational and interpersonal skills including time management teamwork and leadership through activities and reflective tasks It also provides practical guidance on developing vital entrepreneurial attributes such as

critical thinking and problem solving and articulating these skills to prospective employers This text is an essential resource for all students looking to develop the skills experience and attributes which are desired by today s employers It is also ideal for students on personal development planning and employability modules across all disciplines and levels

Technologies of Speculation Sun-ha Hong, 2020-07-28 An inquiry into what we can know in an age of surveillance and algorithms Knitting together contemporary technologies of datafication to reveal a broader underlying shift in what counts as knowledge Technologies of Speculation reframes today s major moral and political controversies around algorithms and artificial intelligence How many times we toss and turn in our sleep our voluminous social media activity and location data our average resting heart rate and body temperature new technologies of state and self surveillance promise to re enlighten the black boxes of our bodies and minds But Sun ha Hong suggests that the burden to know and to digest this information at alarming rates is stripping away the liberal subject that knows for themselves and risks undermining the pursuit of a rational public What we choose to track and what kind of data is extracted from us shapes a society in which my own experience and sensation is increasingly overruled by data driven systems From the rapidly growing Quantified Self community to large scale dragnet data collection in the name of counter terrorism and drone warfare Hong argues that data s promise of objective truth results in new cultures of speculation In his analysis of the Snowden affair Hong demonstrates an entirely new way of thinking through what we could know and the political and philosophical stakes of the belief that data equates to knowledge When we simply cannot process all the data at our fingertips he argues we look past the inconvenient and the complicated to favor the comprehensible In the process racial stereotypes and other longstanding prejudices re enter our newest technologies by the back door Hong reveals the moral and philosophical equations embedded into the algorithmic eye that now follows us all

Digital Destiny Shawn DuBravac, 2015-01-12 Our world is about to change In Digital Destiny How the New Age of Data Will Change the Way We Live Work and Communicate Shawn DuBravac chief economist and senior director of research at the Consumer Electronics Association CEA argues that the groundswell of digital ownership unfolding in our lives signals the beginning of a new era for humanity Beyond just hardware acquisition the next decade will be defined by an all digital lifestyle and the Internet of Everything where everything from the dishwasher to the wristwatch is not only online but acquiring analyzing and utilizing the data that surrounds us But what does this mean in practice It means that some of mankind s most pressing problems such as hunger disease and security will finally have a solution It means that the rise of driverless cars could save thousands of American lives each year and perhaps hundreds of thousands more around the planet It means a departure from millennia old practices such as the need for urban centers It means that massive inefficiencies such as the supply chains in Africa allowing food to rot before it can be fed to the hungry can be overcome It means that individuals will have more freedom in action work health and pursuits than ever before

Handbook of Computational Social Science, Volume 1 Uwe Engel, Anabel Quan-Haase, Sunny Liu, Lars E Lyberg, 2021-11-10 The Handbook of

Computational Social Science is a comprehensive reference source for scholars across multiple disciplines. It outlines key debates in the field showcasing novel statistical modeling and machine learning methods and draws from specific case studies to demonstrate the opportunities and challenges in CSS approaches. The Handbook is divided into two volumes written by outstanding internationally renowned scholars in the field. This first volume focuses on the scope of computational social science ethics and case studies. It covers a range of key issues including open science, formal modeling and the social and behavioral sciences. This volume explores major debates, introduces digital trace data, reviews the changing survey landscape and presents novel examples of computational social science research on sensing, social interaction, social robots, bots, sentiment manipulation and extremism in social media. The volume not only makes major contributions to the consolidation of this growing research field but also encourages growth in new directions. With its broad coverage of perspectives, theoretical, methodological, computational, international scope and interdisciplinary approach, this important resource is integral reading for advanced undergraduates, postgraduates and researchers engaging with computational methods across the social sciences as well as those within the scientific and engineering sectors.

Climate Change and Intergenerational Justice Tracey Skillington, 2019-02-18. Synonymous with catastrophe and destructive tendencies, the Anthropocene provokes reflection on the limits of existing applications of ideas of responsibility, ecological agency and democratic justice. Youth campaigners in particular make emerging insights on the Anthropocene of central importance to an intersubjectively generated redefinition of the just society of the future. Given their span of affectedness, escalating rates of greenhouse gas emissions shape the ecological circumstances of generations to come and implicate them in harm relations they had no hand in creating. The realization is that human inspired climate destructive practices reverberate across plural time frames, thereby raising serious questions about the value of conventional interpretations of the copresence of sources of climate harm and their effects on the health and environmental living standards of all peoples. If injuries provoked by environmental degradation emerge across multiple time frames and affect generations differentially, where do we draw the boundaries of the just society and how do we identify its most relevant subjects? This book explores how such questions have ignited one of the most important debates on democratic justice in recent years: that between generations. For mobilized youth and future justice coalitions campaigning internationally, expanding resource inequalities regionally and intergenerationally are fundamentally issues of unfair exclusions and asymmetries in relations of power between generations. The book offers a comprehensive overview of new insights being generated through such debate on the limitations of democratic presentism as well as current institutional applications of civil and human rights norms. It assesses overall how the metapolitical relevance of modernity's democratic project is being creatively redefined in terms more relevant to Anthropocene futures.

The Representational Theory of Capital Leonidas Zelmanovitz, 2020-11-18. This book proposes a representational theory of capital according to which there is a relation between capital goods in the real side of the economy

and instruments representative of property claims on those goods in the abstract side Financial instruments are treated herein as a particularly liquid form of property claim The relation proposed between these two things is a loose rather than a direct one and the causes for and consequences of the looseness are explored in the book This book aims not merely to simplify our understanding of the relationship between things and claims to things but to make explicit and precise what many current researchers assume implicitly and consequently imprecisely This book will be a tool that researchers can apply to their own research in the form of a standard by which inconsistencies in the literature on Capital Theory can be identified Understanding what capital is requires delving into its nature on both the real and the abstract sides In regard to capital goods what they actually are is made clearer by the thesis that they exist on a spectrum with respect to consumer goods In going back to the philosophical and economic basics no claim is made of being comprehensive The argument is that a crucial idea for our understanding of what capital is that actual capital goods and processes and knowledge are represented in financial instruments and other property claims A formal treatment that lays out the philosophical and economic basics is necessary to put this idea across and the model proposed in the book is a first step in that direction Further by laying out the philosophical and economic basics of the theory the book offers the reader the reasons why having a clearer concept of capital is an important tool for wealth creation and why wealth creation is more than ever necessary for our individual wellbeing and the flourishing of our civilization

Yearbook of International Organizations 2013-2014 (Volume 5) Union of International Associations, 2013-12 The Yearbook of International Organizations provides the most extensive coverage of non profit international organizations currently available Detailed profiles of international non governmental and intergovernmental organizations IGO collected and documented by the Union of International Associations can be found here In addition to the history aims and activities of international organizations with their events publications and contact details the volumes of the Yearbook include networks between associations biographies of key people involved and extensive statistical data Volume 5 includes statistics on geographical regions and subjects where organizations work visual representations of statistical data and networks and historical statistical summaries and analyses

[Criminology](#) Freda Adler, 2021

Sociological Abstracts, 2000 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books book chapters dissertations and conference papers

Invitation to the Life Span with Updates on DSM-5 Kathleen Stassen Berger, 2014-03-03 Edition after edition Kathleen Stassen Berger's bestselling textbooks connect all kinds of students to current state of developmental psychology in an engaging accessible culturally inclusive way Berger's Invitation to the Life Span does this in just 15 concise chapters in a presentation that meets the challenges of exploring the breadth of the life span in a single term The new edition of Invitation to the Life Span incorporates a wide range of new research especially in

fast moving areas such as brain development and psychopathology while taking advantage of innovative new tools for media centered teaching and learning But throughout as always the signature voice of Kathleen Berger ties it all together with relatable explanations of scientific content wide ranging cultural examples and skill building tools for sharper observation and critical thinking

DSM 5 Updates Available for Fall 2014 classes this update version features new content from Kathleen Berger in response to the release of the DSM 5 This new content is integrated into the text without changing pagination or the structure of the chapters A special DSM 5 Supplement by Berger is available for Fall 2013 and Spring and Summer 2014 courses View the Page Referenced Guide to the DSM 5 updates for Invitation to the Life Span
