**Air Transport and Operations** Lori Fischer, David Pérez, Kurt Klein, Jacco Hoekstra, P. Roling, 2012-10-15 Air transport must evolve if it is to optimize its value in the 21st century The mood in the aerospace industry is positive with regard to economic recovery but the focus in this transitional time must be on sustaining value without losing sight of environmental and safety priorities This book presents the proceedings of the joint conference held in Delft the Netherlands in June 2012 incorporating the 3rd International Air Transport Operations Symposium ATOS the 3rd Association of Scientific Development in Air Traffic Management in Europe ASDA Seminar the 6th International Meeting for Aviation Products Support Processes IMAPP and the 2012 Complex World Seminar The conference brought together over 200 participants from industry and academia all of whom share the common goal of improving performance and capacity by advancing the efficiency sustainability and safety of air transport Presentations at the conference were divided equally between academic papers and more applied industry sessions The book includes the majority of academic papers presented at the conference and provides a wide overview of the issues currently of importance in the world of air transport *Crew Resource Management* Barbara G. Kanki, José Anca, Robert L. Helmreich, 2010-01-20 Crew Resource Management Second Edition continues to focus on CRM in the cockpit but also emphasizes that the concepts and training applications provide generic guidance and lessons learned for a wide variety of crews in the aviation system as well as in the complex and high risk operations of many non aviation settings Long considered the bible in this field much of the basic style and structure of the previous edition of Crew Resource Management is retained in the new edition Textbooks are often heavily supplemented with or replaced entirely by course packs in advanced courses in the aviation field as it is essential to provide students with cutting edge information from academic researchers government agencies FAA pilot associations and technology Boeing ALION This edited textbook offers ideal coverage with first hand information from each of these perspectives Case examples which are particularly important given the dangers inherent in real world aviation scenarios are liberally supplied An image collection and test bank make this the only text on the market with ancillary support The only CRM text on the market offering an up to date synthesis of primary source material New edition thoroughly updated and revised to include major new findings complete with discussion of the international and cultural aspects of CRM the design and implementation of LOFT Instructor website with testbank and image collection Liberal use of case examples **The Global Corporation** Laura P. Hartman, Patricia H. Werhane, 2013-12-19 This text brings together case studies focusing on specific instances of corporate best practices All too often we showcase cases based on questionable or unethical corporate behavior Instead the editors bring together in this book examples of how some firms got it right Certainly there is no claim that the companies in these case are perfect some of them may have histories that include questionable practices But these are companies that work to foster trust both internally and in their relationships with customers suppliers shareholders and the communities in which they operate The book is not

however merely a descriptive iteration of effective corporate conduct The editors conclude with an analysis of frameworks for corporate and managerial ethical decision making frameworks that help to establish models for best practices These frameworks then can be generalized and applied to other corporate situations and replicated by other companies in their search for excellence and the resulting avoidance of misconduct
