In 1999, McDonald's spent \$181 million to introduce their "Made for You" system. Under this new system, standard food items are not held in a bin until they are sold. In the "Made for You" system, modern technology greatly assists McDonald's operations. When a customer places an order, the sandwich items are immediately displayed on a computer monitor in the kitchen and a tone sounds to alert the kitchen staff.

Upon a new order, an employee in the kitchen will toast the bun, and assemble the sandwich accordingly.

Standard items simply list the name of the sandwich, while customized orders list the sandwich name and the desired condiments. Once the sandwich is assembled, it is presented to the food loading area, where a different staff person retrieves the sandwich and completes the order by adding French fries, desserts, etc. The system works the same for front counter orders as well as drive-thru orders.

Unfortunately, the introduction of the "Made for You" system did not come easily. McDonald's watched its customer satisfaction drop for the three consecutive years beginning in 1999.

After further research, they realized that although the new system provided fresher food, it was not as quick as the previous system. Instead of reverting back to the old system, McDonald's continues to fine tune "Made for You" and add new options to help the system work faster.

### **Revitalization Plan**

In order to cope with the first ever quarterly loss that resulted from inefficient use of the Made-for-you-system McDonald's has devised a new plan to increase profits. Previously, the corporation emphasized adding
