Macrohistory and Globalization Grinin, Leonid, 2012-06-01 The present monograph considers some macrohistorical trends along with the aspects of globalization Macrohistory is history on the large scale that tells the story of the entire world or of some major dimensions of historical process For the present study three aspects of macrohistory have been chosen These are technological and political aspects as well as the one of historical personality Taken together they give a definite picture of unfolding historical process which is described from the beginning of human society formation to the present day and near future The combination in the monograph title of the two terms macrohistory and globalization is in no way artificial On the

contrary the connection of these terms is organic at least as the real goal of macrohistory is to find meaning in the past so as to create new possibilities of meaning for the future The analysis of globalization also includes three aspects political economic and futurological as today the world may well be regarded as being at the start of a new global reconfiguration The author presents his ideas of the world prospective political and in some respects social economic development basing on the analysis of macrohistory and contemporary globalization processes The monograph also considers some global scenarios of the World System s near future

Rethinking Sustainable Development Seck TAN, 2024-06-03 This book demonstrates falsified economic performance of global economies when the environment is not recognised as a capital and when the ecosystem is overlooked towards sustainable development Seck begins with an analysis of standard macroeconomic framework and policy practice He argues with reference to environmental accounting literature that environmental capital must form an integral component of economic measurement This paves the way for an alternative environmental macroeconomics framework for policy analysis that promotes sustainable development The book demonstrates how environmental capital can be measured with reference to select OECD countries and provides a methodology for analysing how macroeconomic goals are related to a steady state economy Seck then concludes with a summary of the conflict between current economic growth and ecosystem preservation and outlines possible policy improvements and directions for research Rethinking Sustainable Development is an invaluable reference for policymakers as well as researchers and students of environmental economics sustainable development and macroeconomics

KONDRATIEFF WAVES Leonid E. Grinin, Tessaleno C. Devezas, Andrey V. Korotayev, Sergey Yu. Malkov, Arno Tausch, Brian J. L. Berry, Euel Elliott, Marco Gallegati, Zenonas Norkus, Valentina M. Bondarenko, Stephen I. Ternyik, Elżbieta Mączyńska, William R. Thompson, Leo Nefiodow, Anthony Harper, Though the researchers of the theory of long and medium term cycles are certainly worried about the economic situation they understand that the cyclicity still remains an inevitable attribute of economic development And

Juglar's aphorism that crisis is a consequence of the preceded prosperity is still true. In this third issue of the Yearbook Kondratieff Waves with the subtitle Cycles Crises and Forecasts we present a number of insight contributions on nature regularities and interconnections among cycles of different duration. Some economic cycles may result in a severe economic crisis. The current one shows once again the importance of the study of cyclical dynamics and its peculiarities. Between the 1980s and 1990s the Keynesian receipts were replaced by neoliberal and monetarist ones which seemed to be miraculous as well. The depleted growth was marked with the largest global crisis of 2008 which also showed that within globalization when regulation in the international arena is impossible yet there recur the signs of Juglar cycles of the 19th and first half of the 20th centuries with their uncontrollable upwards and sharp declines evolving into collapses and panic. This is supported by the fact that for eight years the world has been at the depressive phase. This edition will be useful for economists, social scientists as well as for a wide range of those interested in the problems of the past, present and future of global economy and globalization. This research has been supported by the Russian Foundation for the Humanities Project No 16-02-14053.

Introduction to Digital Transformation Abbas Strømmen-Bakhtiar, This book aims to inform the non IT specialist about the technological revolution that is taking place and specifically how the digital component of it is affecting our lives. It is hoped that this information will fill possible information gaps in readers' mental model enabling them to make better informed decisions. This book can also be used as a textbook in a stand alone introductory course to the digital revolution and its effects on society. The course could be used in both bachelor and master degree programs in business management, healthcare management, sociology or any other non IT programs.

Chapter 1 This chapter although the longest is a brief review of the interactions between technology economy and politics The subject is a much neglected one and I believe that understanding of these interactions is vital for understanding the underlying causes of some of our most important pressing issues The chapter discusses the interactions between technologies economy and politics examining the effect of technologies on economic development and political ideologies

Chapter 2 This chapter deals with technological revolutions in general and the digital revolution in particular I shall discuss the components of the digital economy These being knowledge digitisation virtualisation molecularization integration internetworking disintermediation convergence innovation sharing economy immediacy and discordant In addition we shall examine the disruptors that are changing the face of competition in the marketplace

Chapter 3 This chapter deals with digital transformation i e the process of using digital technology in all areas of business changing the way the businesses operate and deliver value to their customers We shall examine models for dealing with digital transformation

Chapter 4 We shall examine one of the most important developments of the 21st century namely the advancements in Artificial Intelligence AI We shall look at how the human brain works and what is intelligence We shall look at the artificial neural networks machine learning and deep learning We shall also look at the deployment of AI in various fields such as healthcare finance Natural Language Processing NPL news media and warfare

Chapter 5 This chapter deals with one of the most controversial and yet promising developments in finance and distributed secure databases namely cryptocurrencies and blockchains This subject is divided into two parts the first part deals with the cryptocurrencies and their viability as currencies One of the most popular cryptocurrencies the Bitcoin will be examined in depth The second part is somewhat technical and deals with the inner workings of the blockchains As with cryptocurrencies many see a bright future for the blockchains especially in the form of smart contracts Many believe that blockchains will be of great value in areas such as finance handling contracts healthcare and more Blockchain promises to bring disintermediation to many industries and thereby reduce costs

Chapter 6 Technological revolutions tend to disrupt the lives of many middle aged and older workers New technologies give birth to new industries destroying the old industries in the process New technologies often require special skills that the old industry workers do not possess The laid off workers of the old industries can seldom find jobs in new industries since the new industries often rely on new technologies and skills that the old industry workers do not possess These workers need training something that the prospective employers do not provide Also the new technologies including AI are automating many tasks reducing the need for human workers This chapter discusses the issue of automation and its effect on employment Additionally the type of jobs that are in danger of automation is discussed as well

Chapter 7 While chapter six discussed the employment situation chapter seven considers the type of education required by the new industries Also the weaknesses of the existing educational system are considered and alternative systems are proposed

Chapter 8 History tells us that whenever there has been a technological revolution it has been accompanied by a shift in power both nationally and

internationally The global shift of power has seldom been a peaceful affair It often has resulted in major wars and global reorientation This chapter discusses the possibility of the global shift of power Currently there are not that many countries or entities that can be considered as contenders Of the three Russia European Union and China only one China is considered to have any chance of wresting power from the United States The technological economic and military power of China is

Fuller,Warren Young,2025-02-17 A Financial Theory of the Business Cycle presents a new approach to business cycle theory based on the net present value The book develops a novel diagrammatic approach to illustrate how fractional reserve banking systematically distorts net present value calculations In addition to providing fresh insights the new diagrammatic approach provides a comparative framework that can be used to compare pre existing theories including those of John Maynard Keynes Friedrich Hayek Milton Friedman and Robert E Lucas Jr The net present value is the most important

concept in the theory and practice of modern finance As such it is the proper framework for explaining the systematic financial losses that occur during the business cycle Eugen von B hm Bawerk and Irving Fisher developed the modern theory of the net present value and the financial theory of the business cycle developed in this book is rooted in their tradition Although financial elements played a central role in their respective theories Keynes and Hayek did not use the net present value This failure created problems that still haunt business cycle theory today This book addresses these problems and attempts to steer financial theories of the business cycle back to the course set by B hm Bawerk and Fisher In addition to macroeconomists this book will appeal to financial economists money and banking experts accountants financial analysts and businesspeople generally *Loose-leaf for Macroeconomics* Sean Flynn, Stanley Brue, Campbell McConnell, 2014-01-10
